The North Pole is in the Arctic.

The South Pole is in Antarctica.

They are the earth's coldest

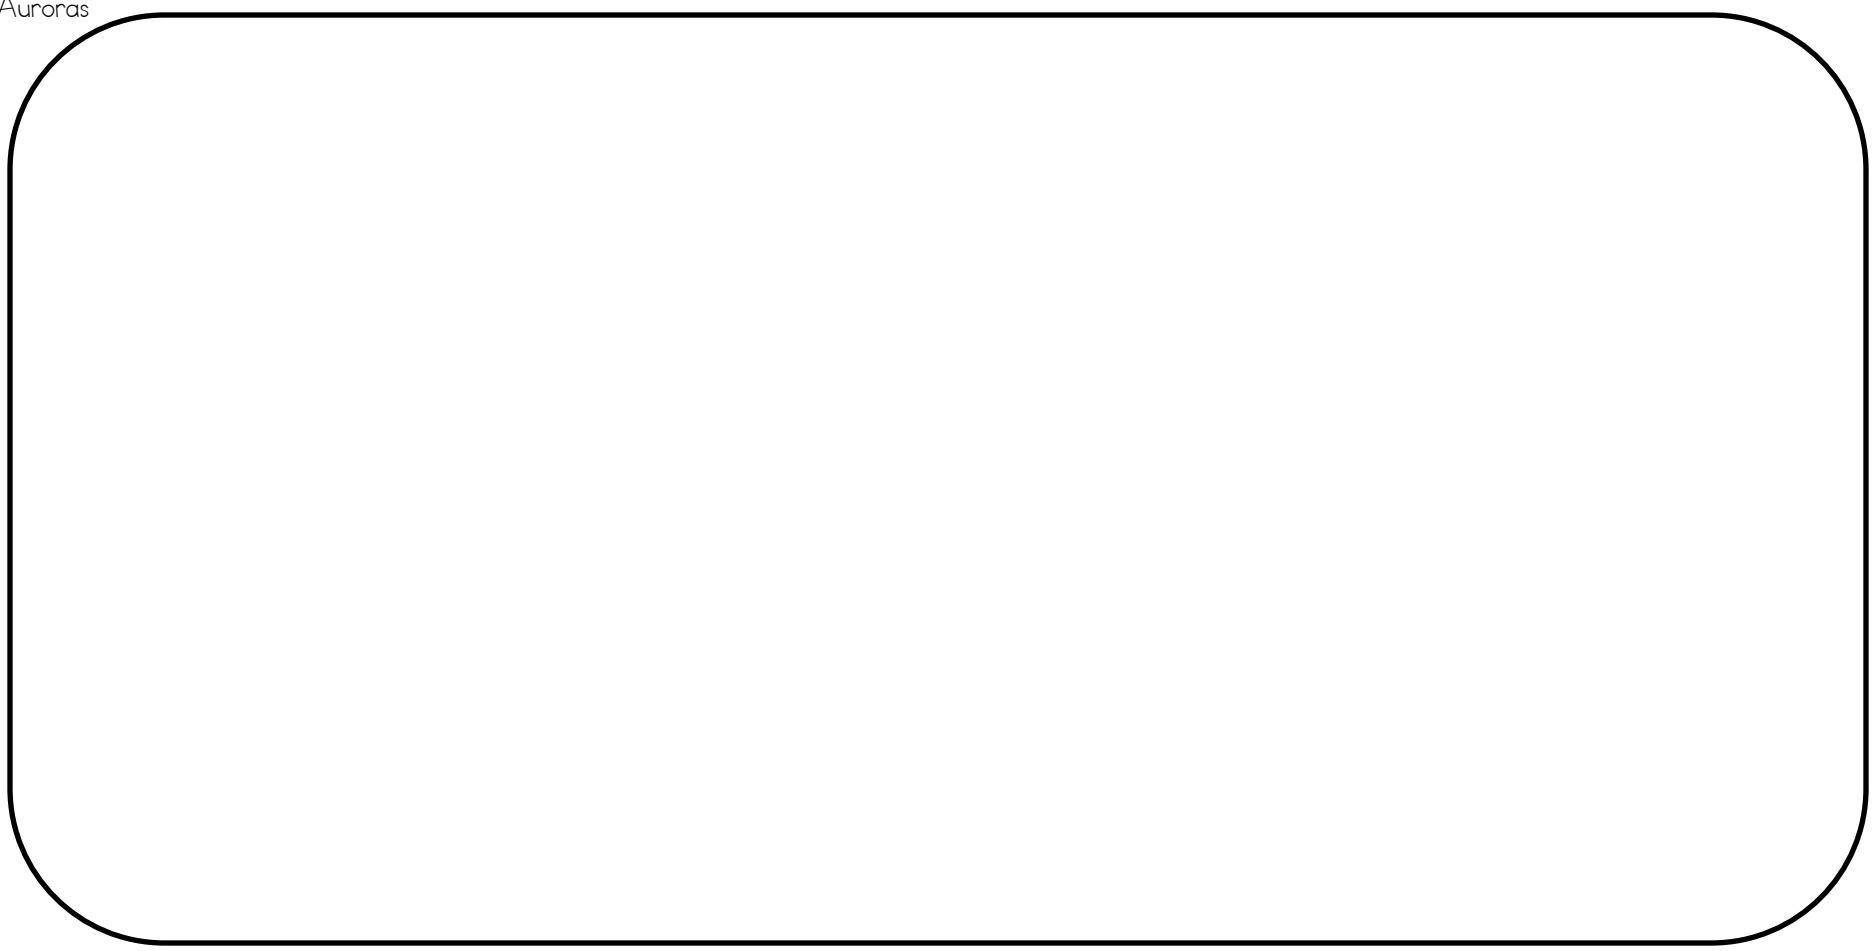

places. Special animals live there.

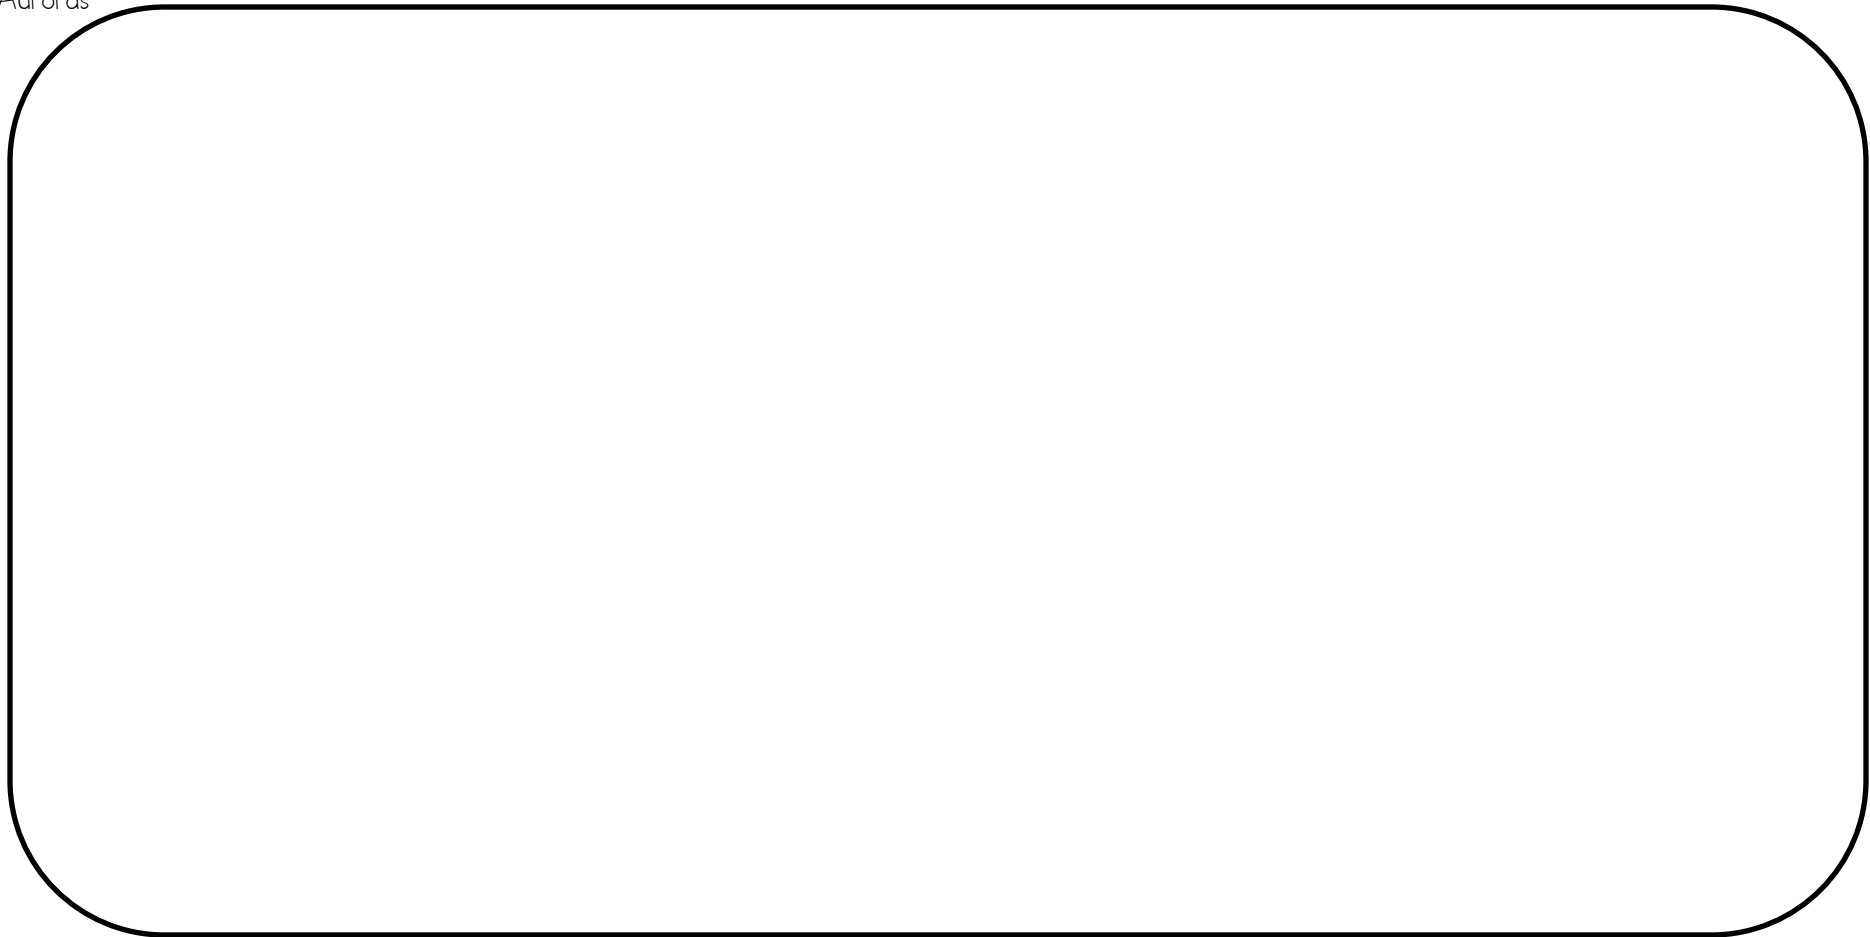

Handwriting practice lines consisting of multiple rows of three horizontal lines each (top solid, middle dashed, bottom solid). The lines are spaced evenly across the bottom third of the page.

,

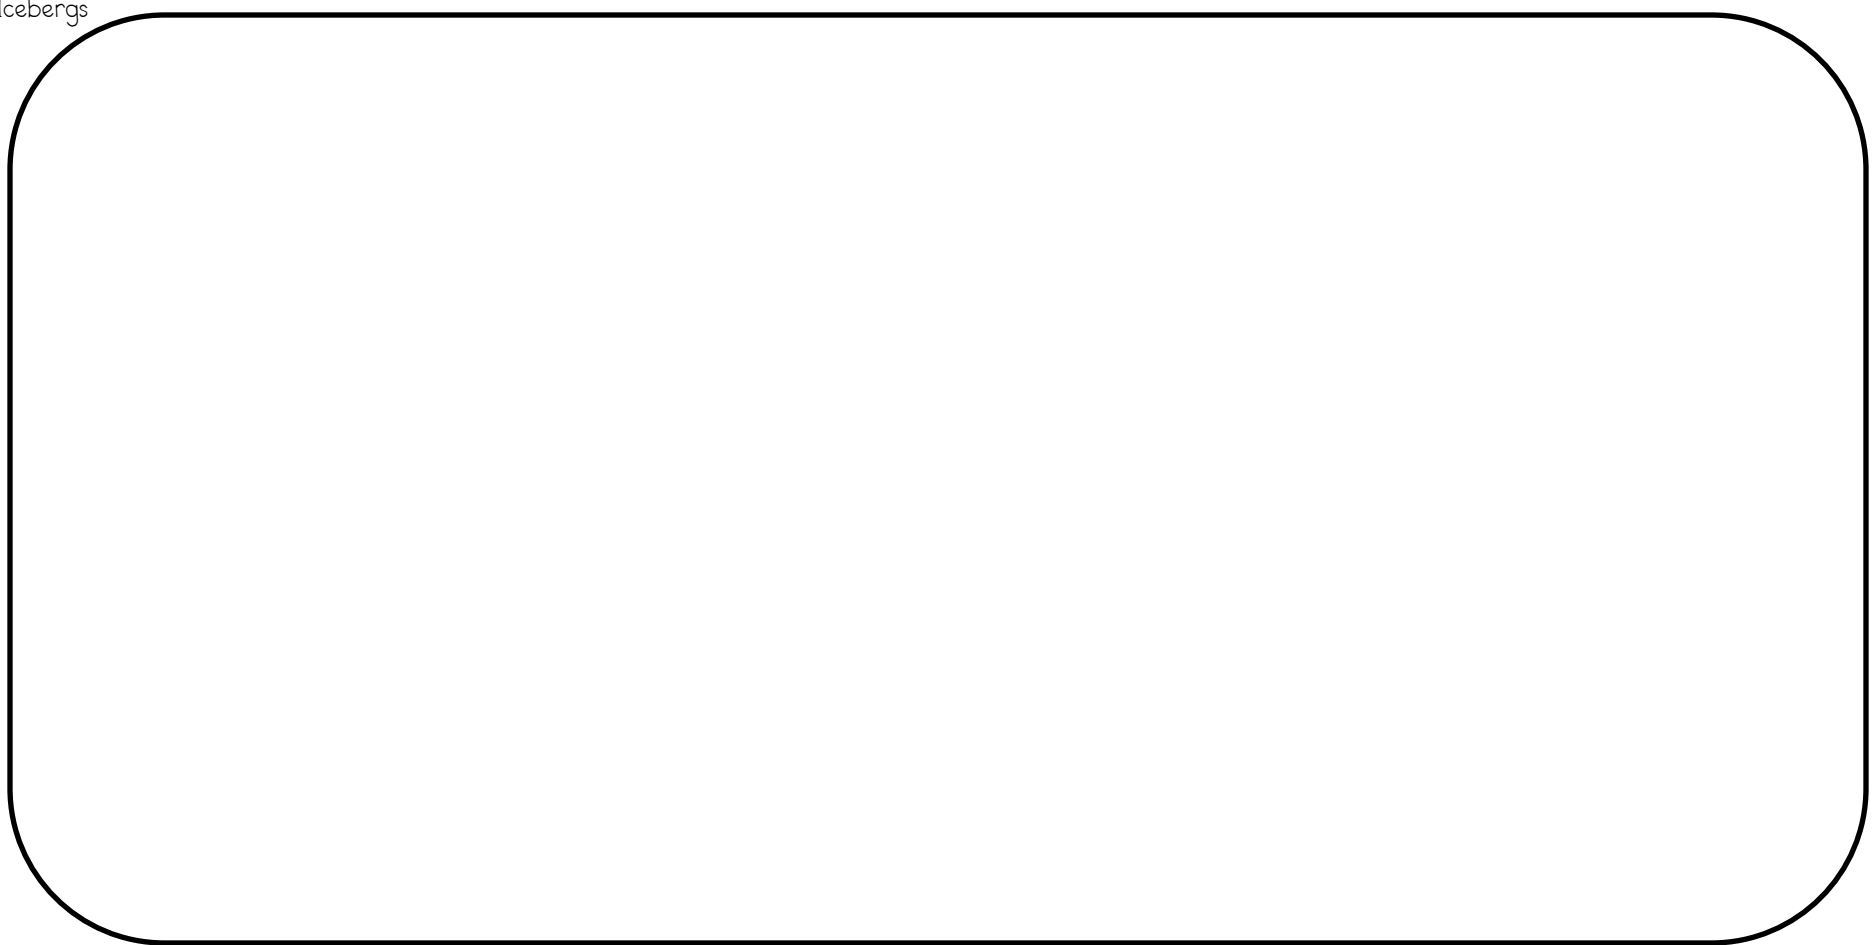

.

Auroras are colors in the sky. They form around the poles. We see them on cloudless nights. They take different shapes.

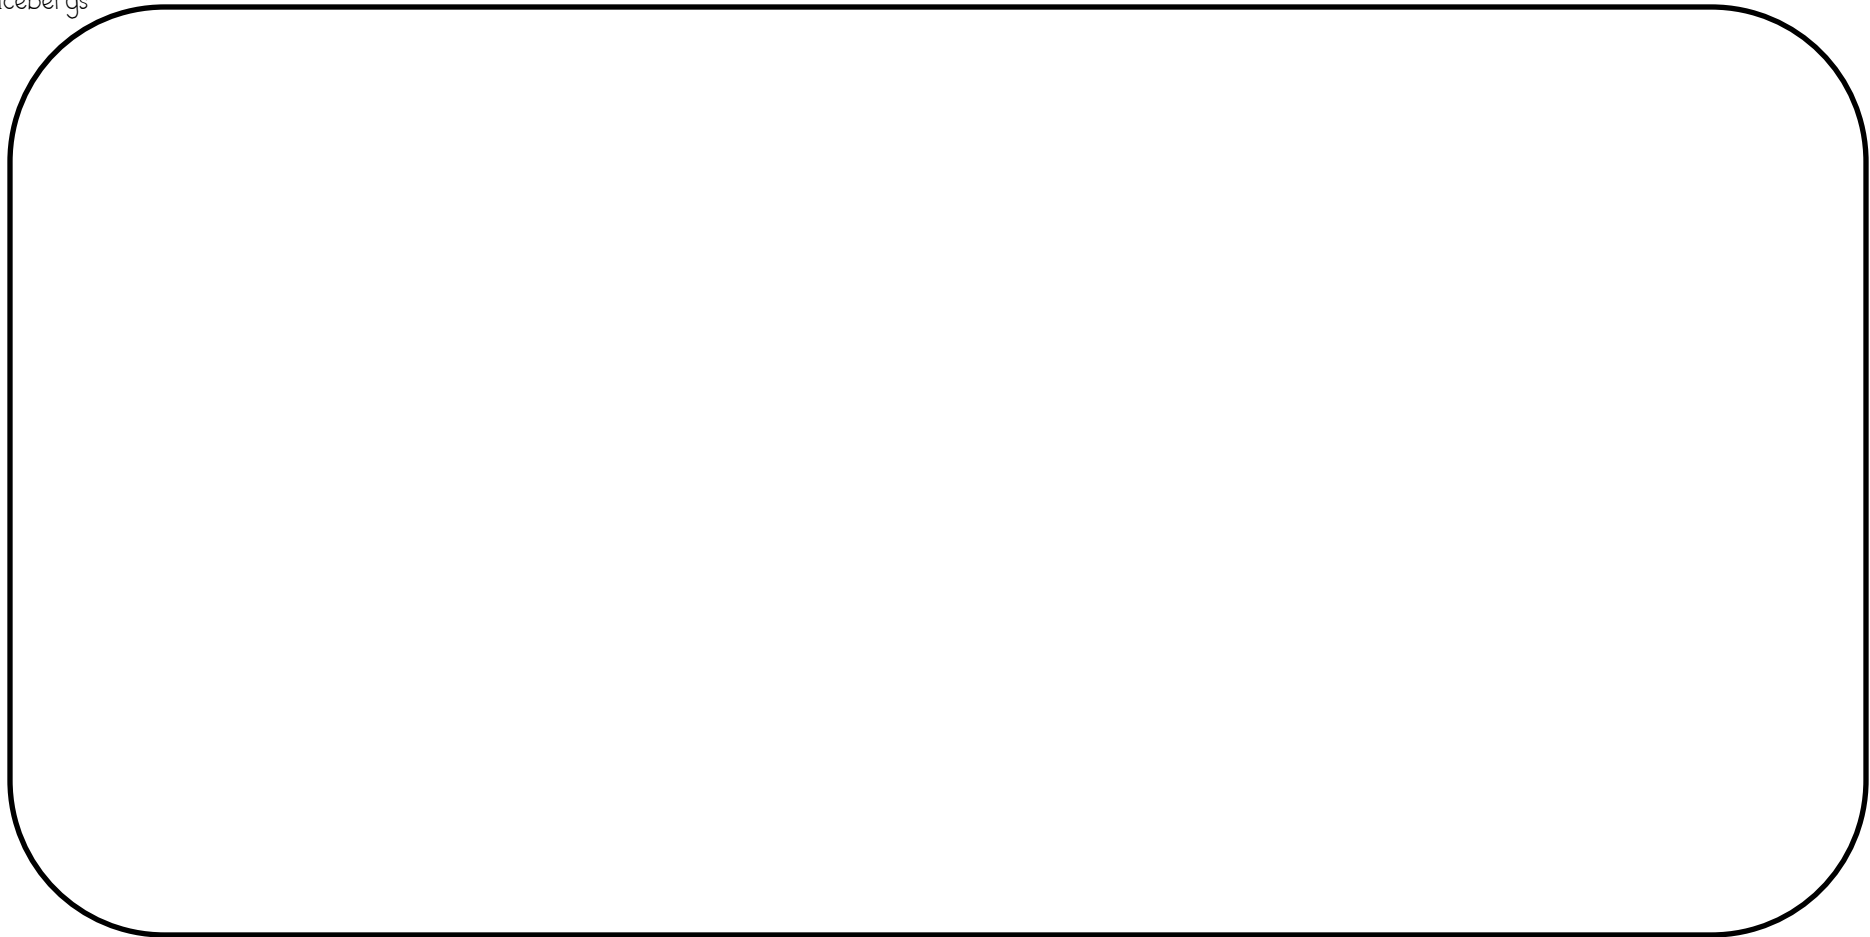

Handwriting practice lines consisting of seven rows. Each row has a solid top line, a dashed middle line, and a solid bottom line. The first row has a dot on the bottom line. The second row has a dot on the middle line. The third row has a dot on the bottom line. The fourth row has a dot on the bottom line. The fifth row has a dot on the bottom line. The sixth row has a dot on the bottom line. The seventh row has a dot on the bottom line.

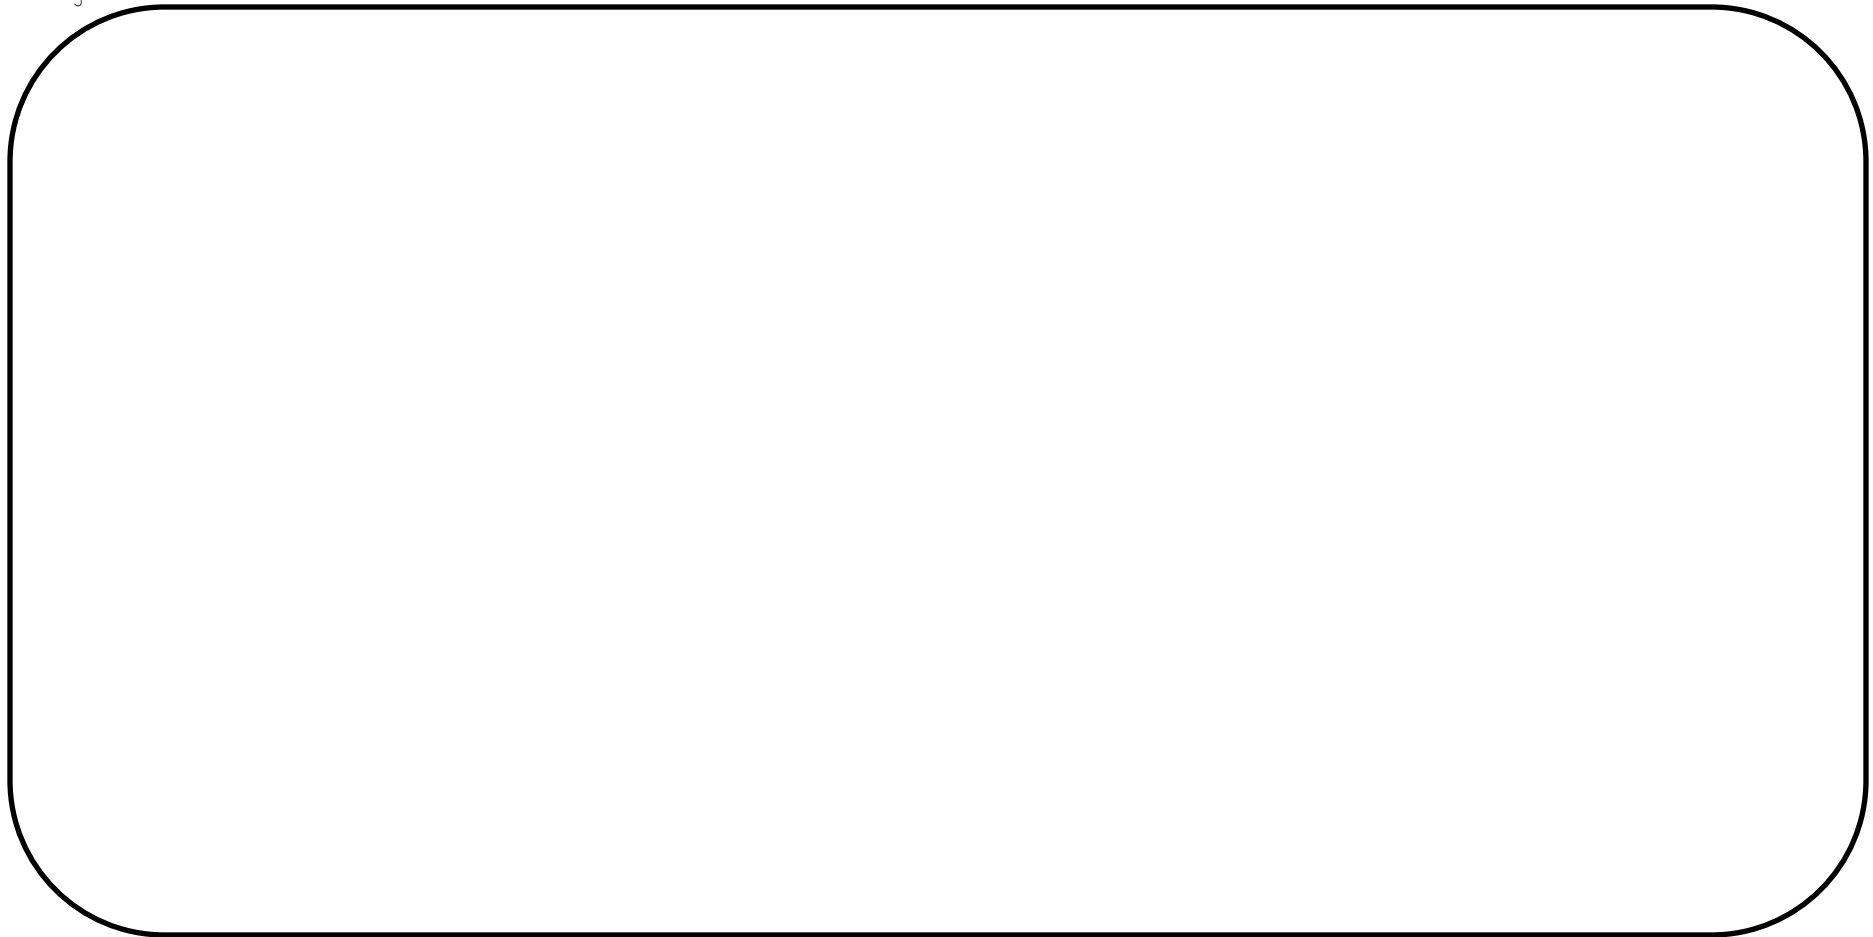

Chunks of ice float in oceans.

They are called icebergs. Icebergs
form near the poles. They melt in
warmer waters.

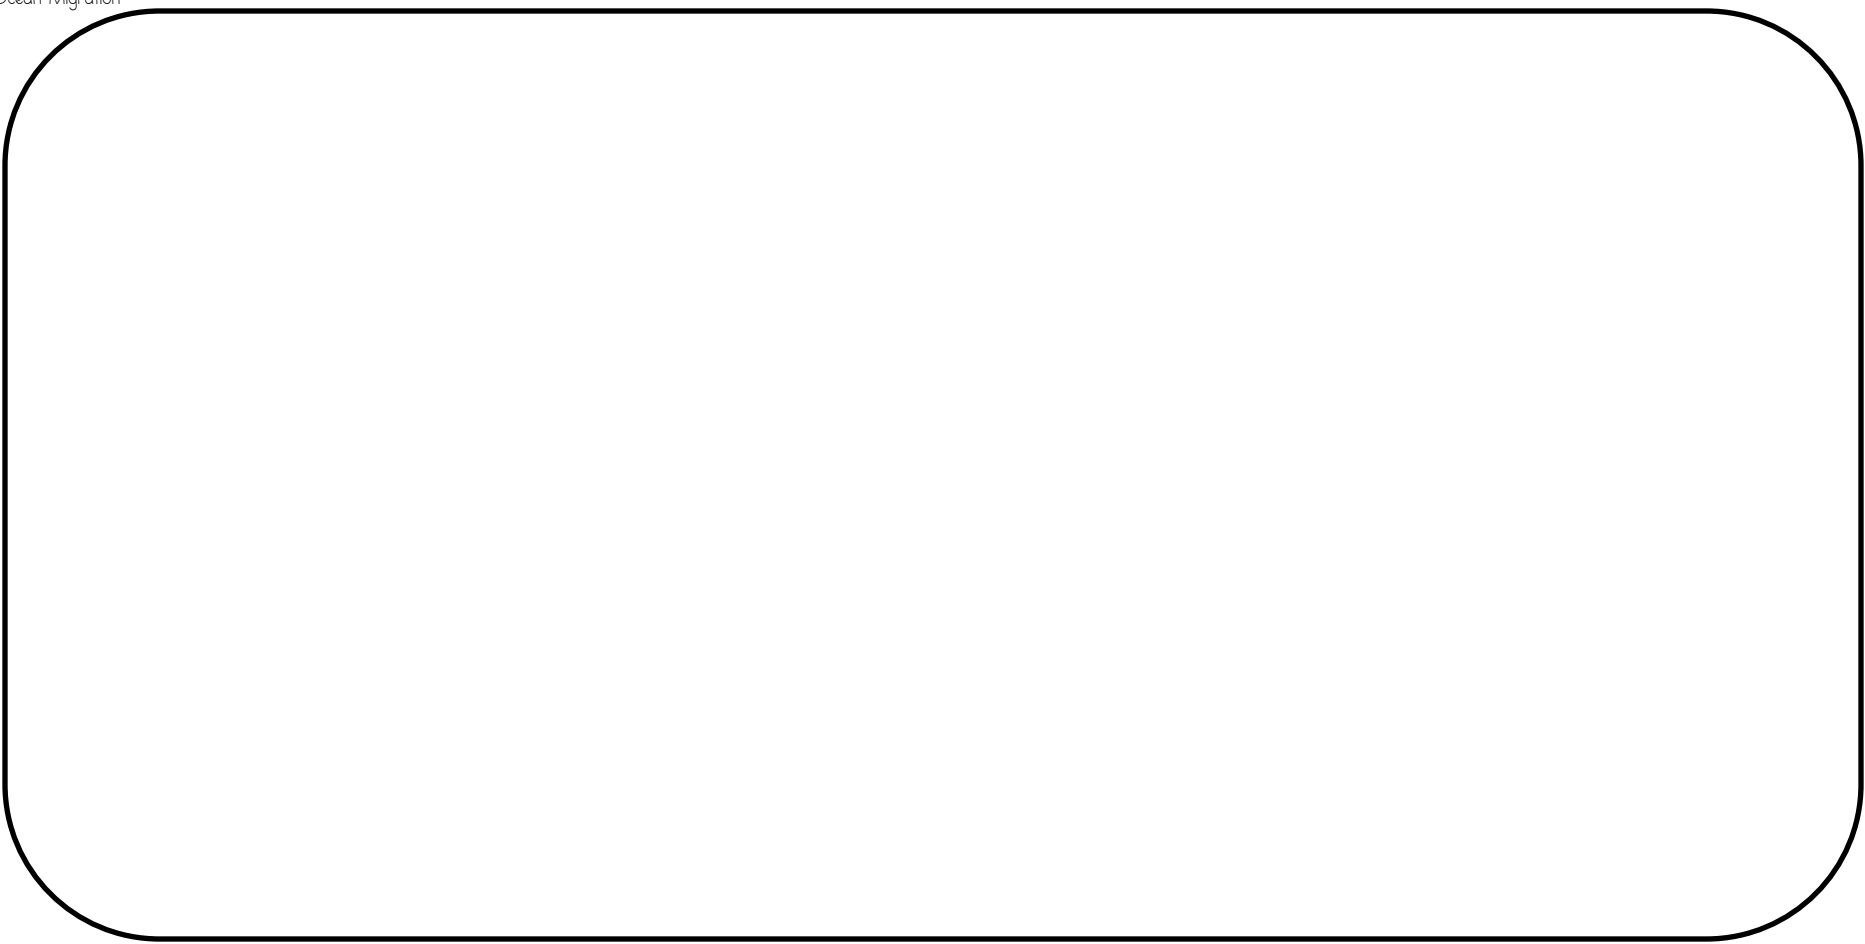

Handwriting practice lines consisting of multiple rows of three horizontal lines each (top solid, middle dashed, bottom solid). Each row contains a small black dot positioned on the middle dashed line, serving as a starting point for letter formation.

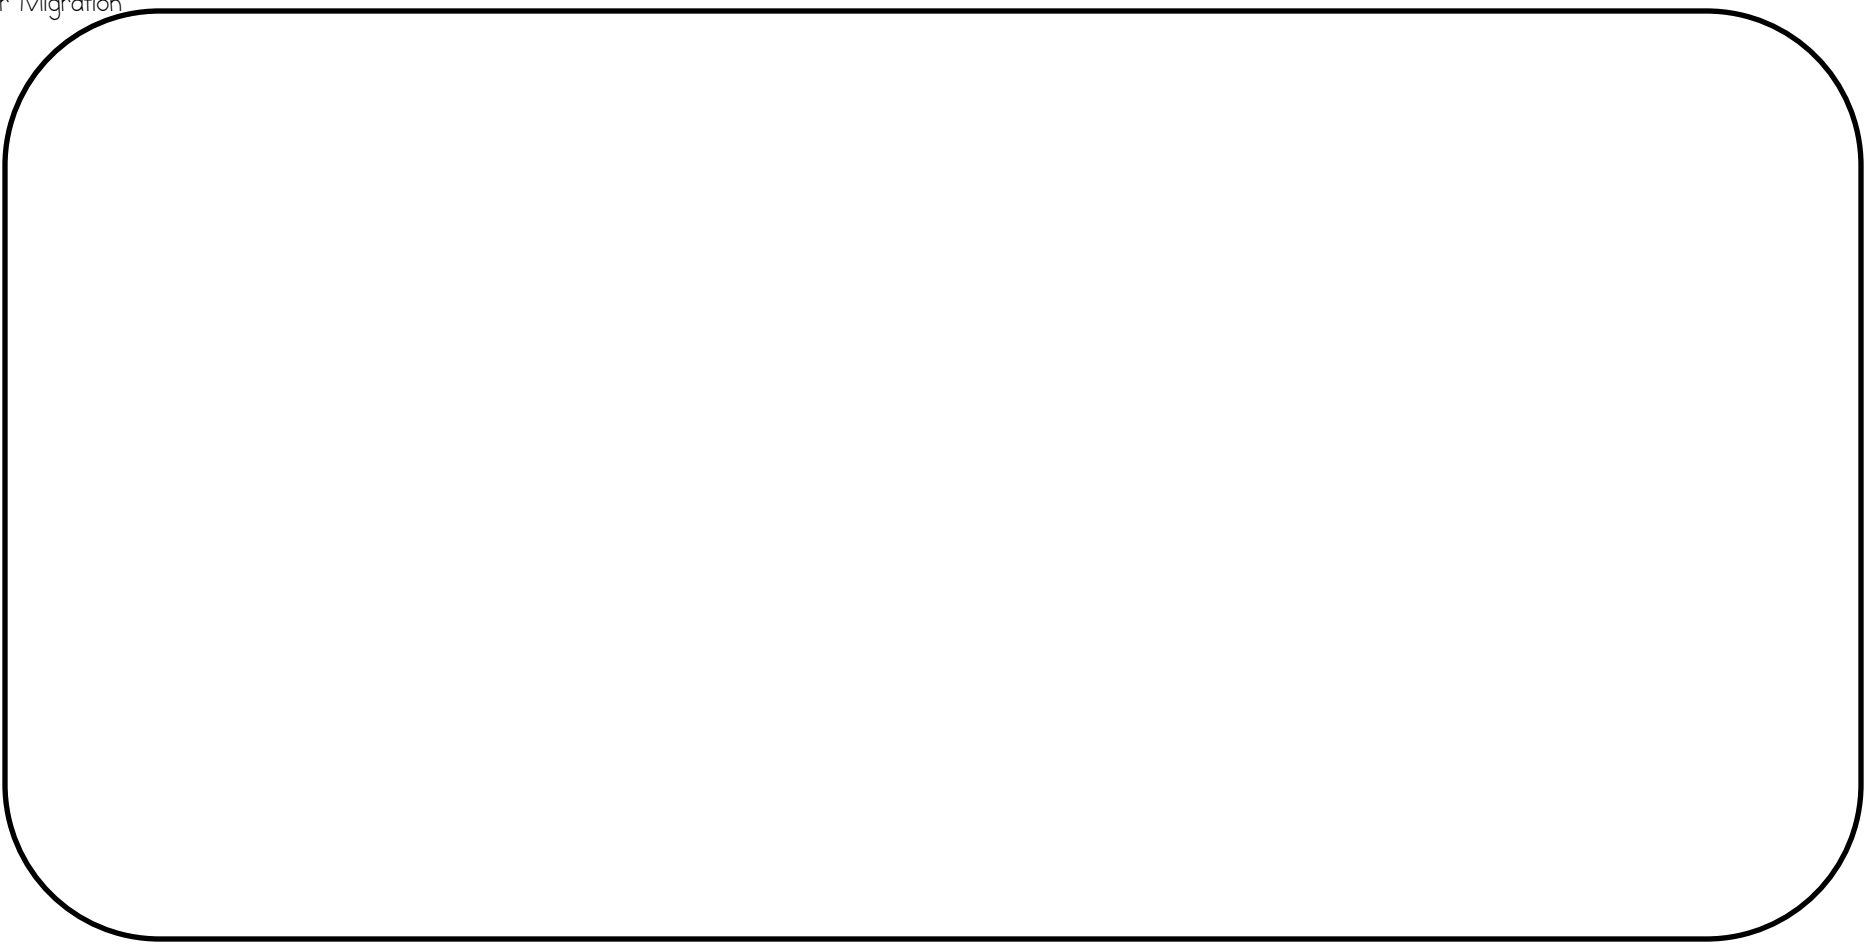

Whales live all over the world. In
summer, something happens.

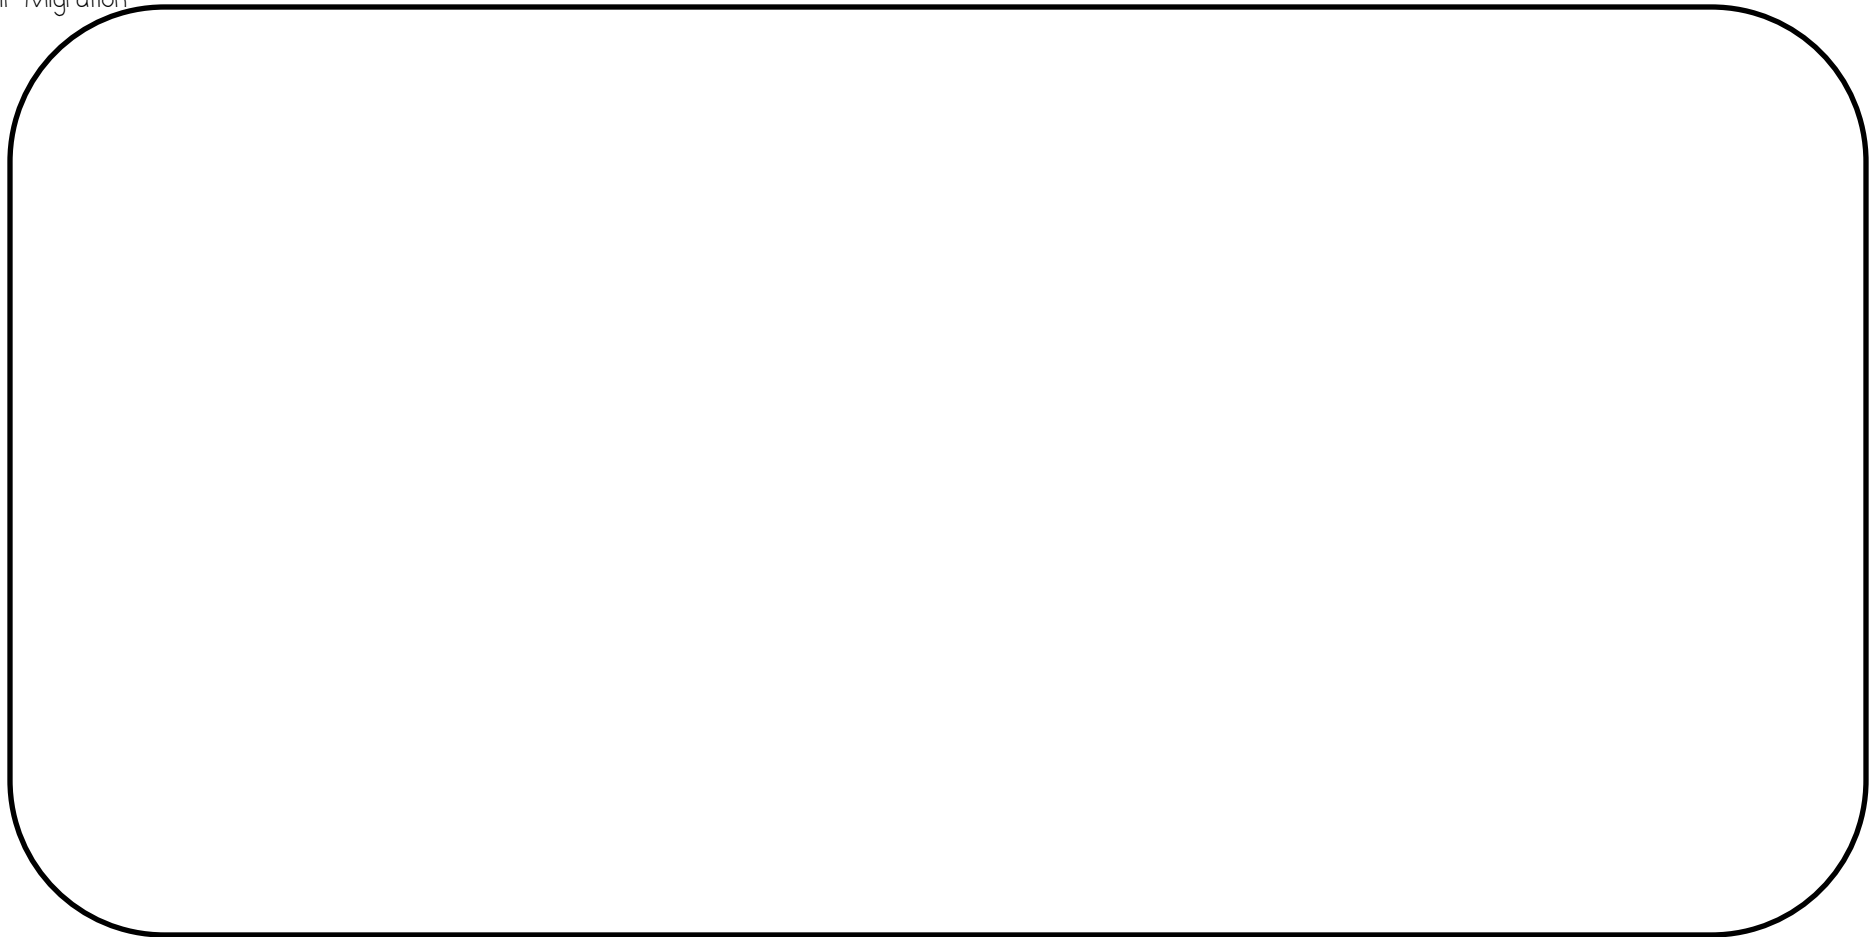

Whales swim toward the poles. We
call it migration.

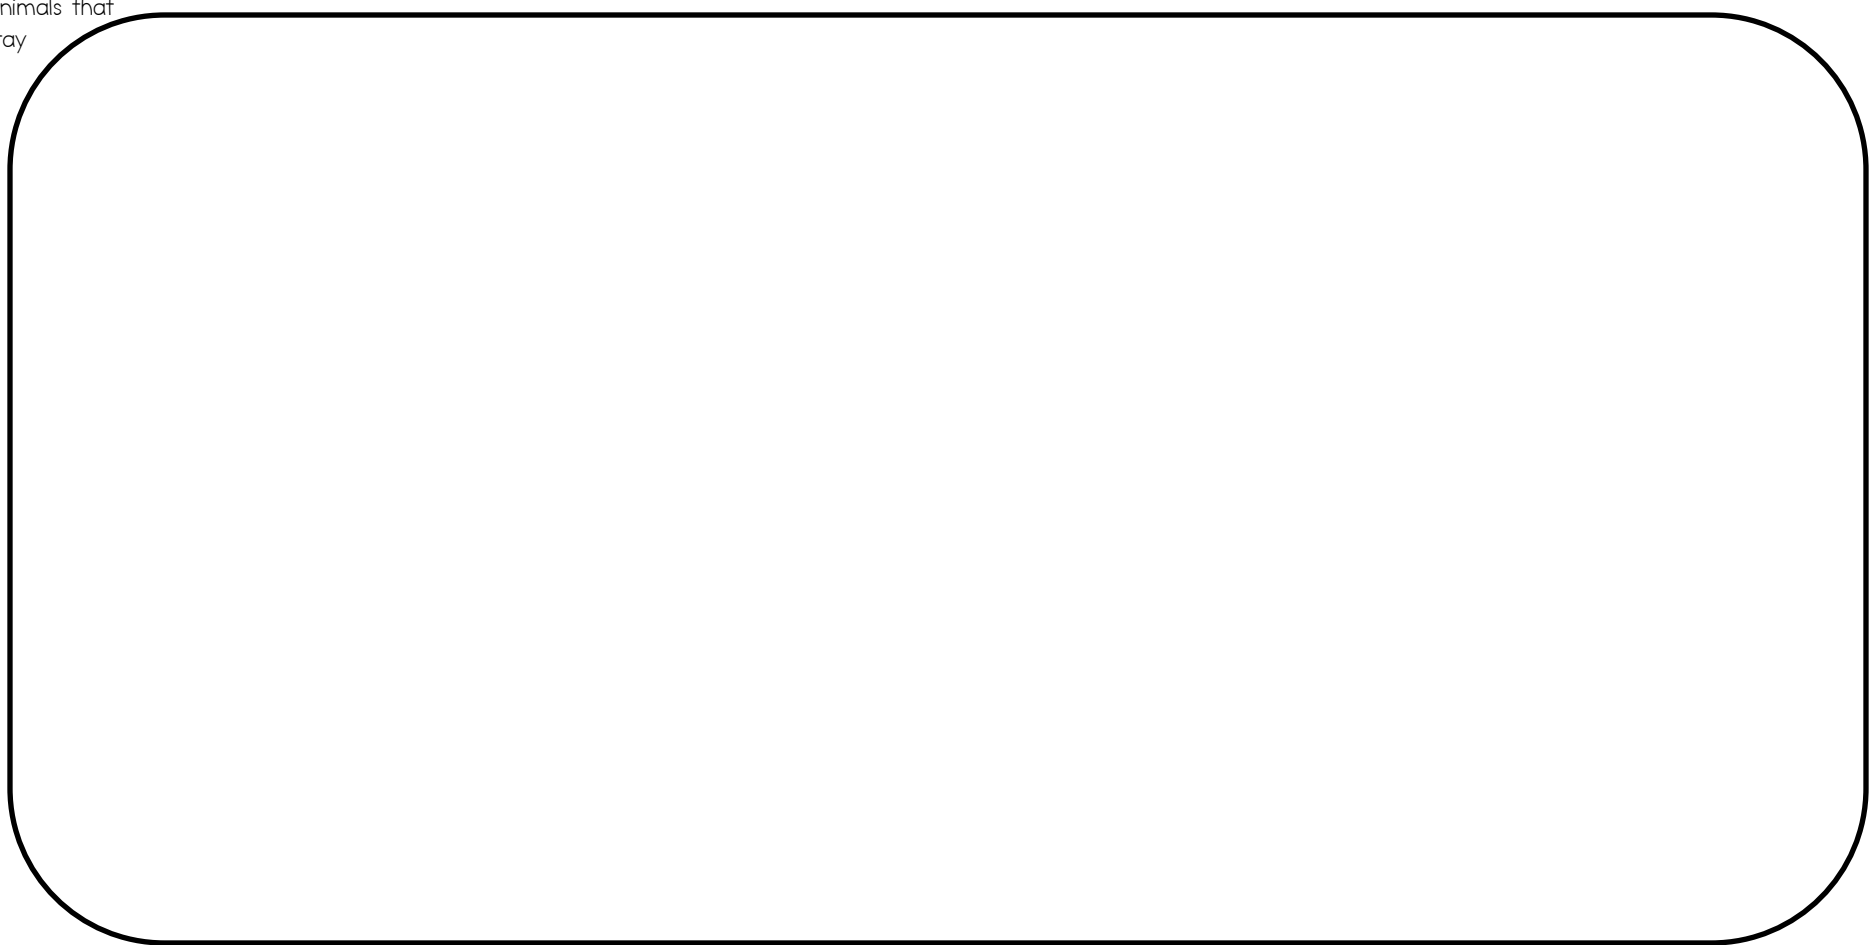

Handwriting practice lines consisting of multiple rows of three horizontal lines each (top solid, middle dashed, bottom solid). Some lines have a small black dot placed on the top solid line as a starting point for writing.

Many birds migrate. Some fly
north to the Arctic. A few fly
south to the Antarctic. They stay
all summer.

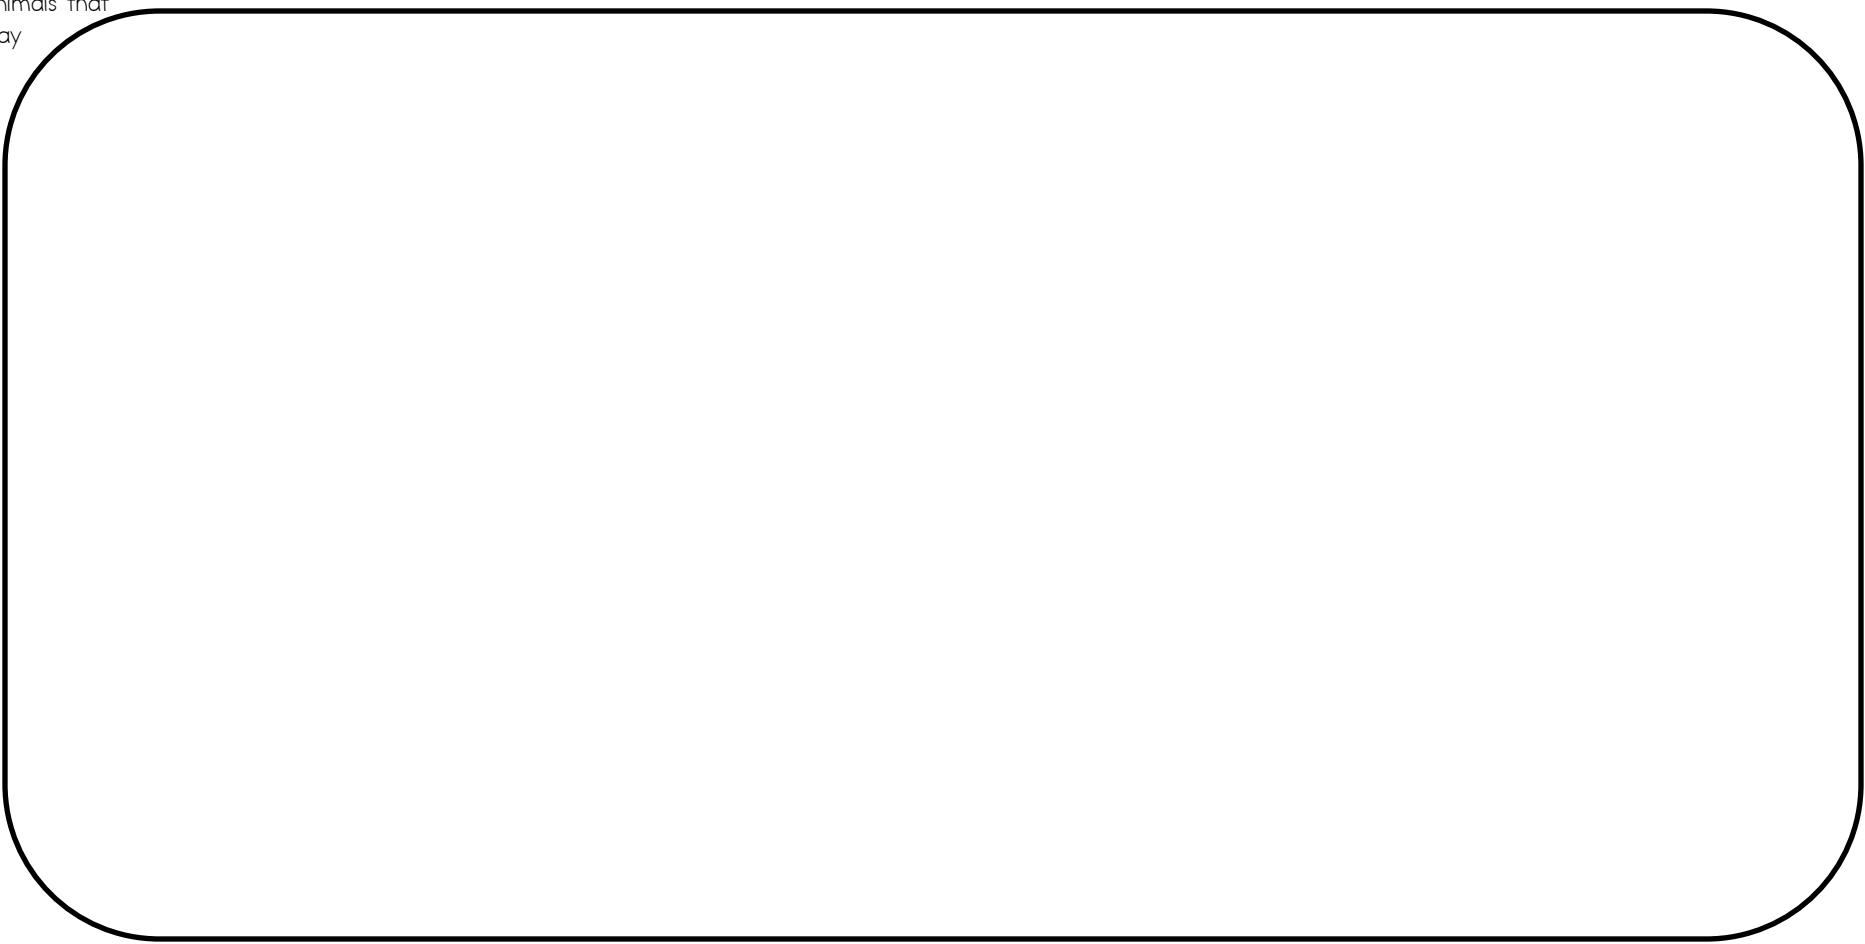

Handwriting practice lines consisting of four rows of three columns. Each column contains a set of three horizontal lines: a solid top line, a dashed middle line, and a solid bottom line. Small black dots are placed on the bottom line of the second column in the first row, the third column in the second row, the first column in the third row, and the third column in the fourth row.

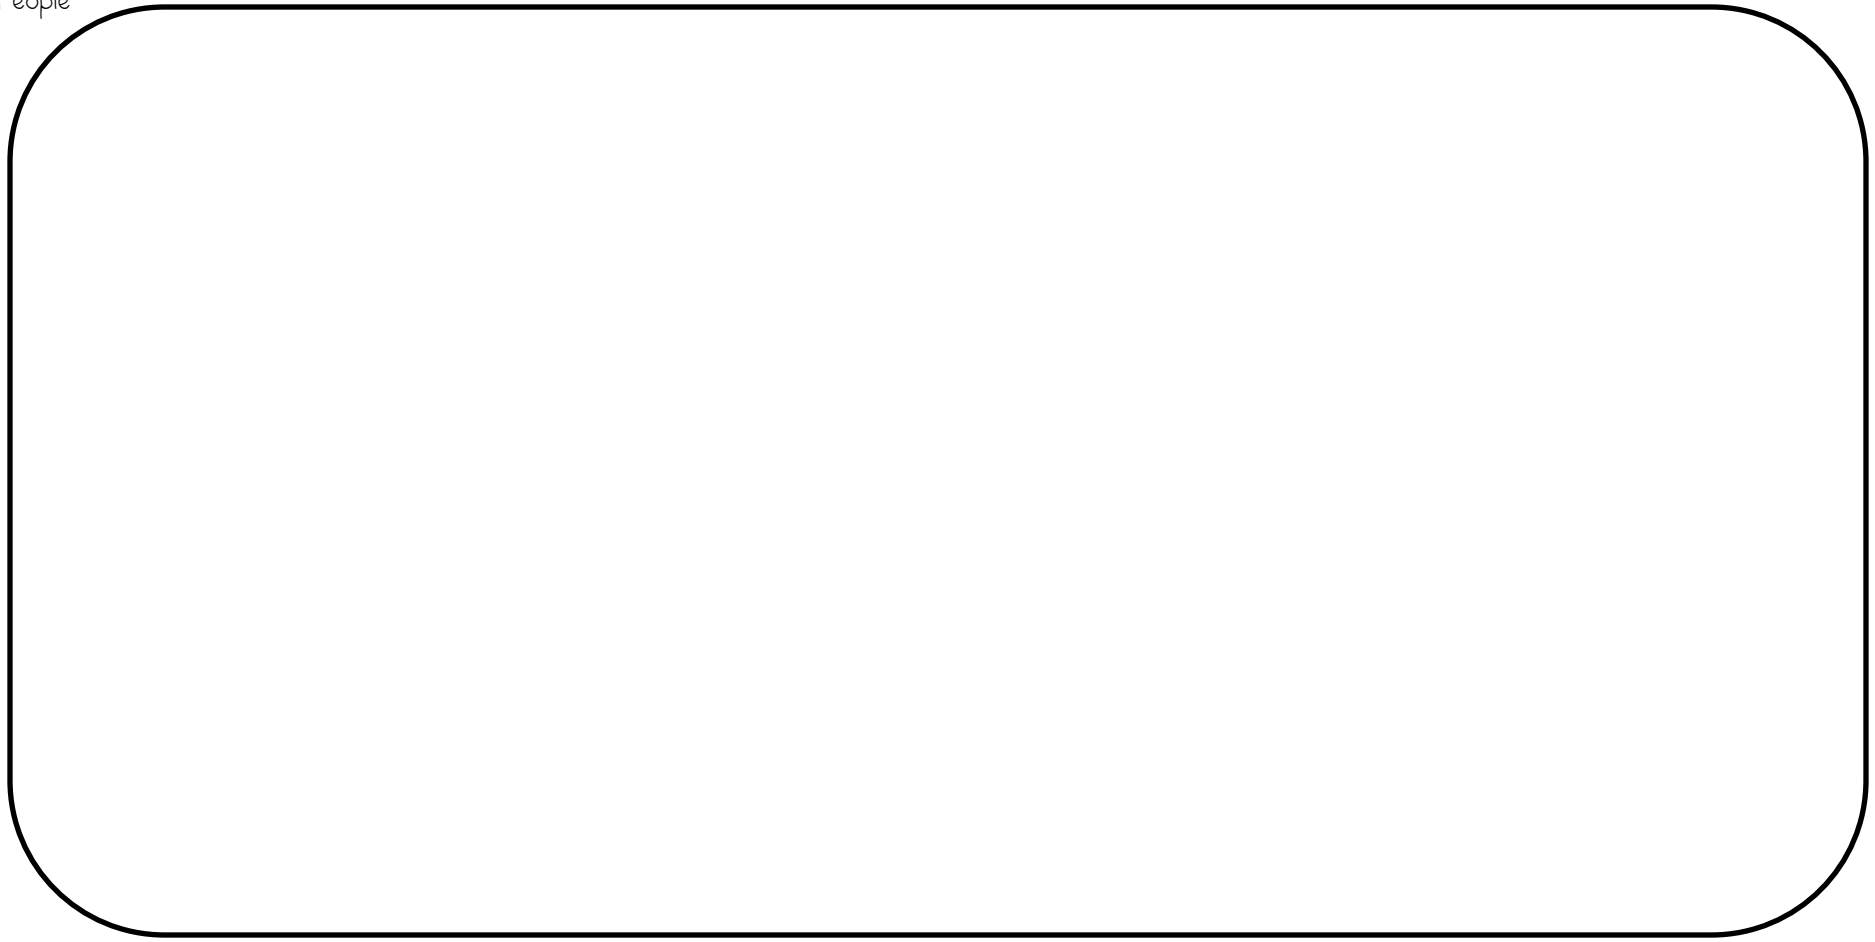

Some animals do not migrate.
They stay in the cold all year.
Many of them have blubber.
Blubber keeps them warm.

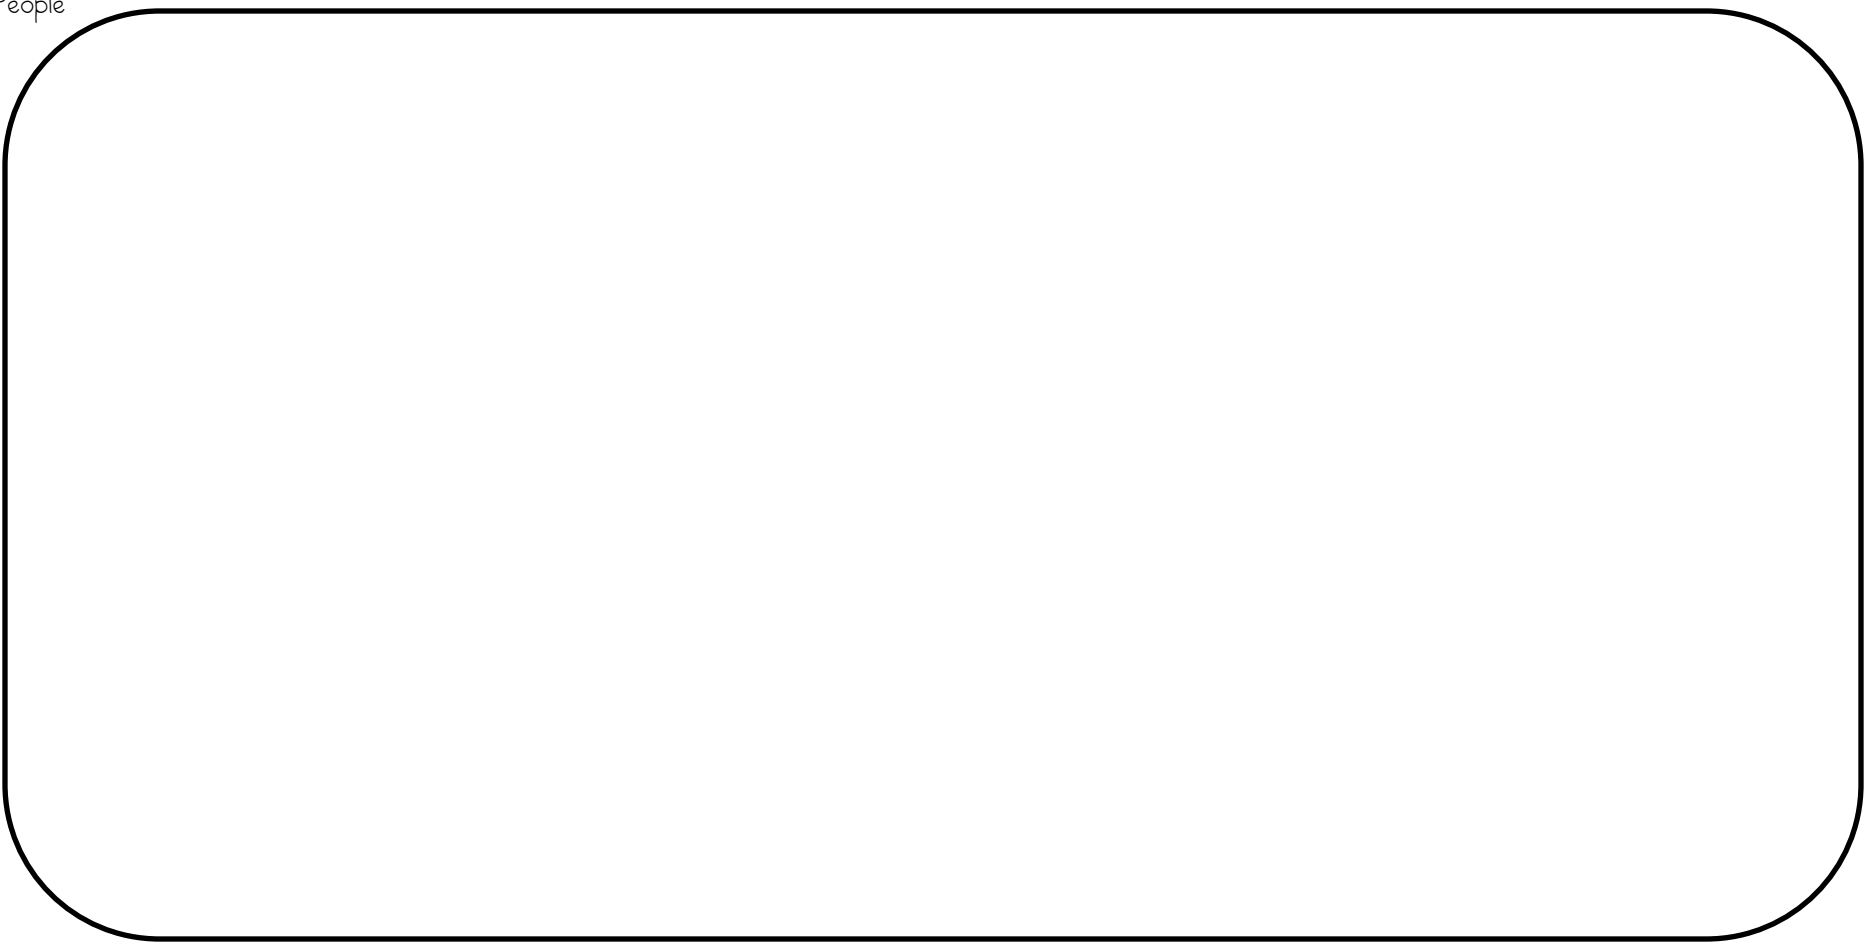

Animals that
Stay

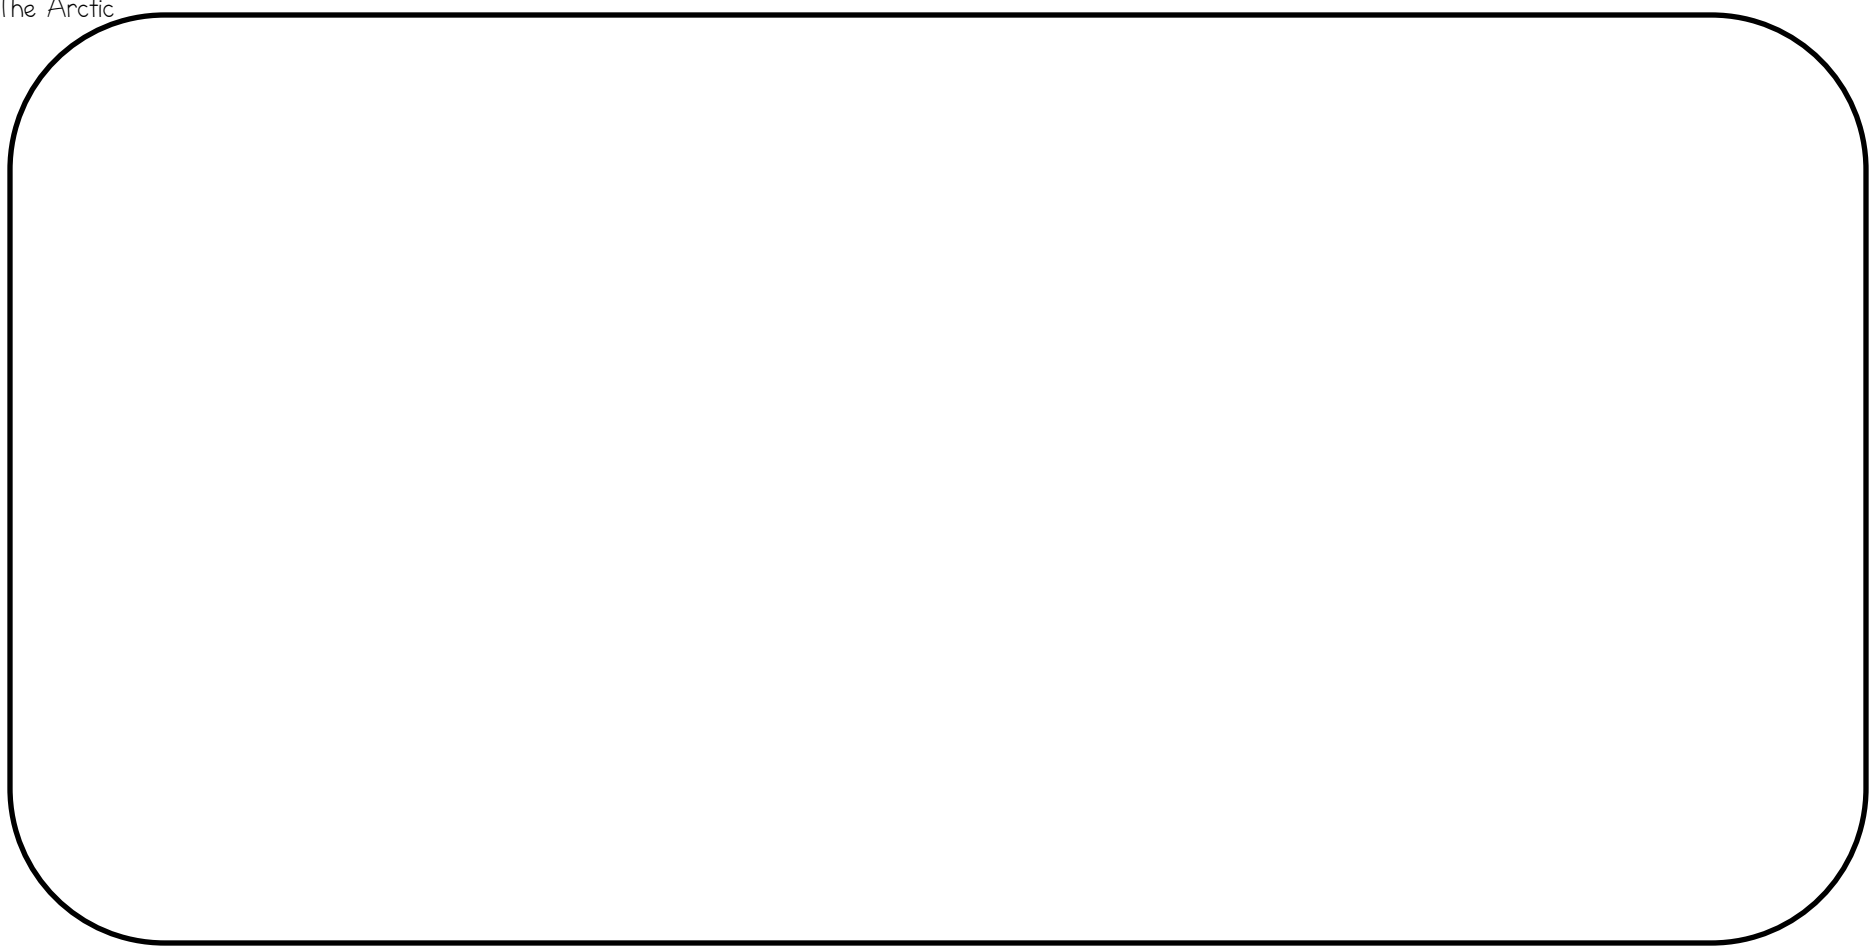

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Some lines have a small black dot placed on the top line to indicate the starting point for a letter.

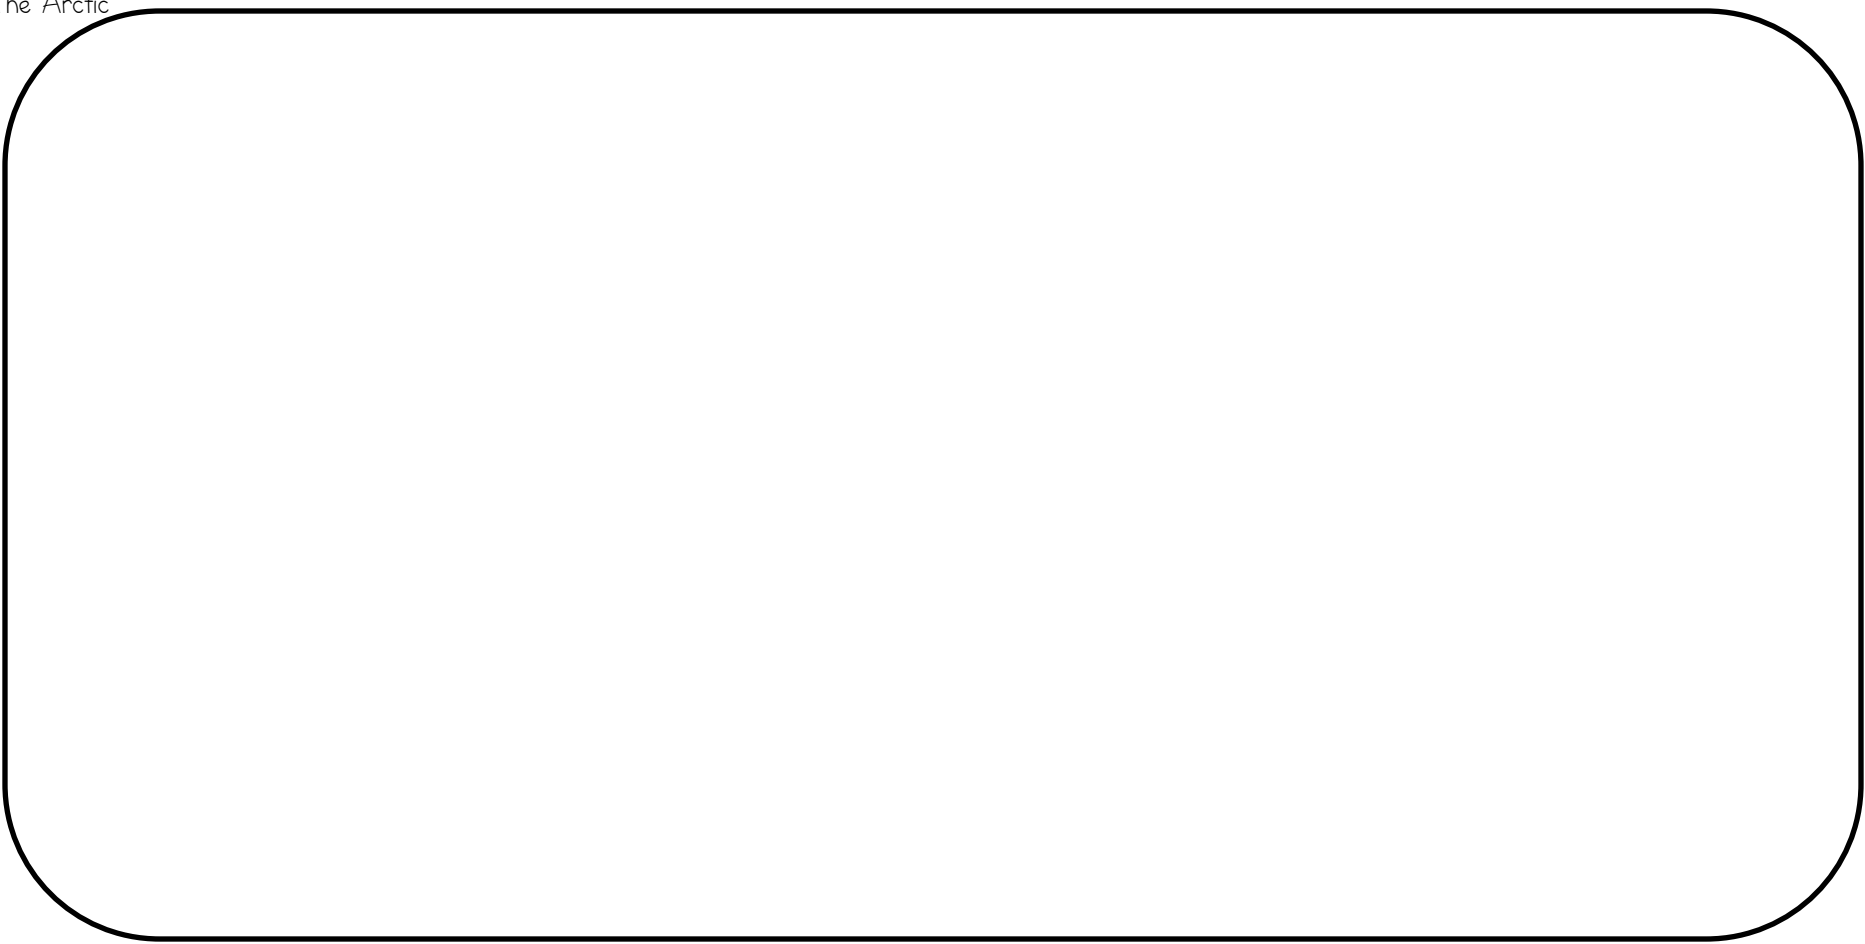

People live in the far north. The
Arctic is their home. People visit
Antarctica. Antarctica is very
cold.

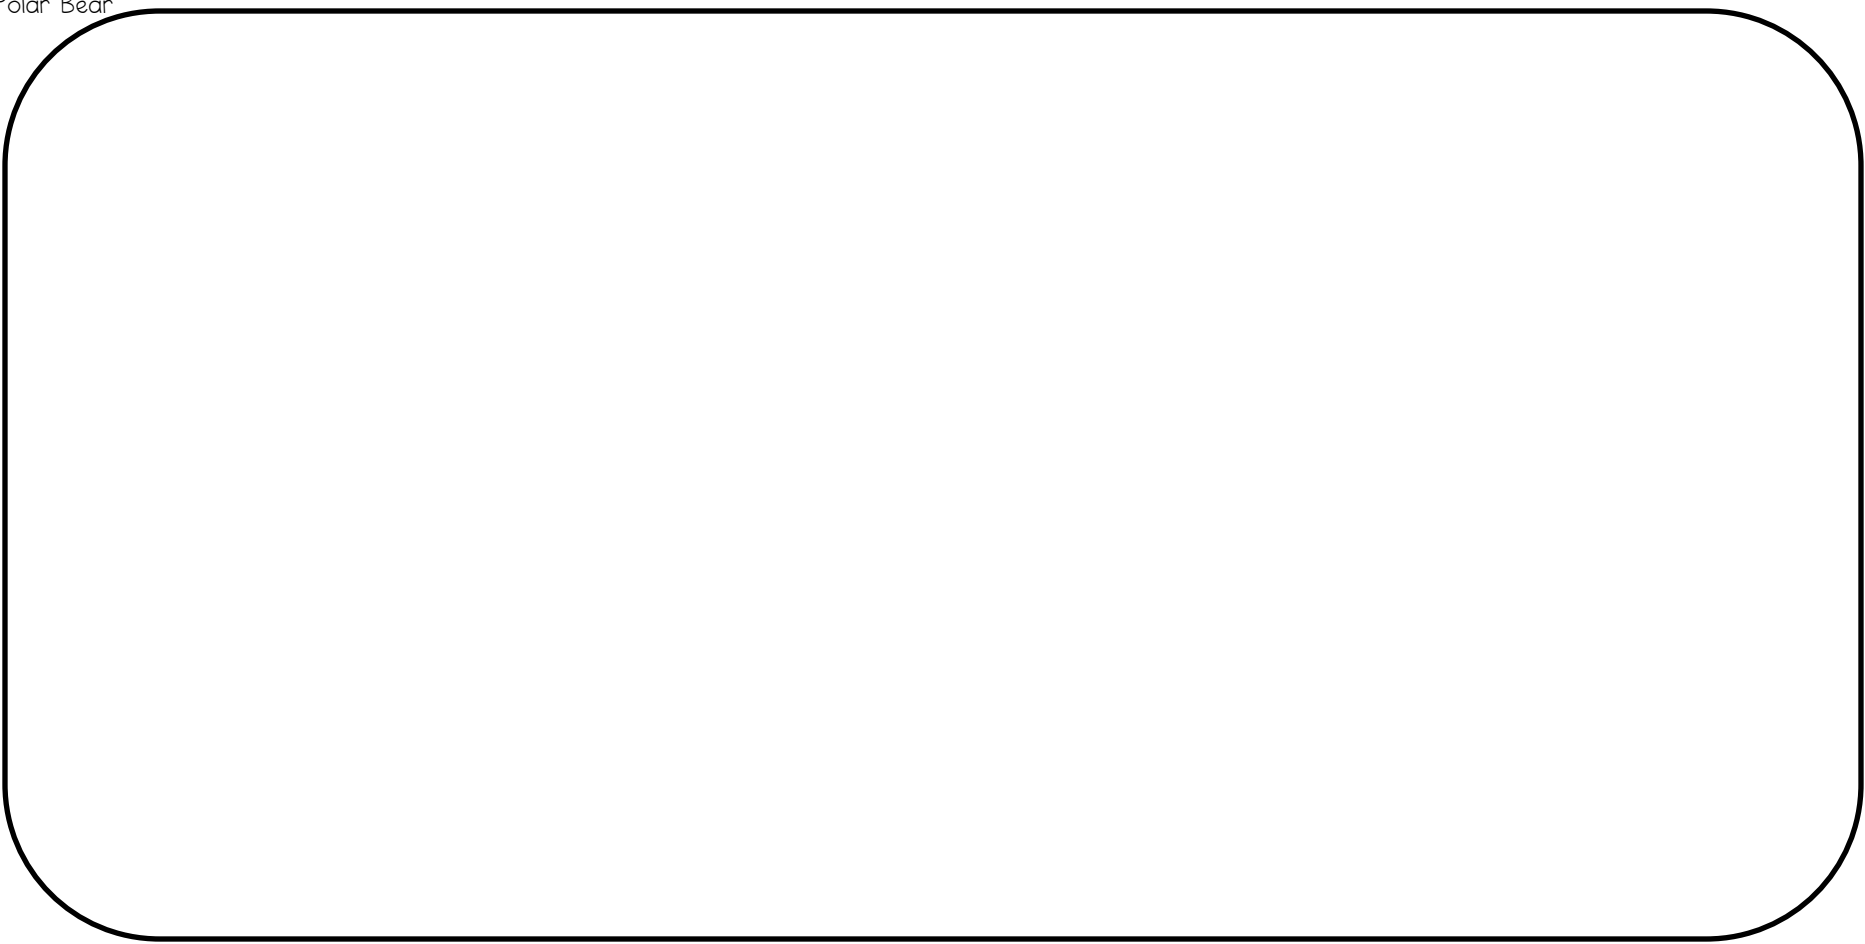

Handwriting practice lines consisting of seven sets of three horizontal lines (top, middle dashed, bottom) for writing practice. Each set is separated by a small gap. The first set has a dot on the top line. The second set has a dot on the middle dashed line. The third set has a dot on the bottom line. The fourth set has a dot on the top line. The fifth set has a dot on the middle dashed line. The sixth set has a dot on the bottom line. The seventh set has a dot on the top line.

The Arctic Ocean is icy. Continents
surround the ocean. Snow covers
the land in winter. Forests border
the Arctic land.

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot for starting a letter.

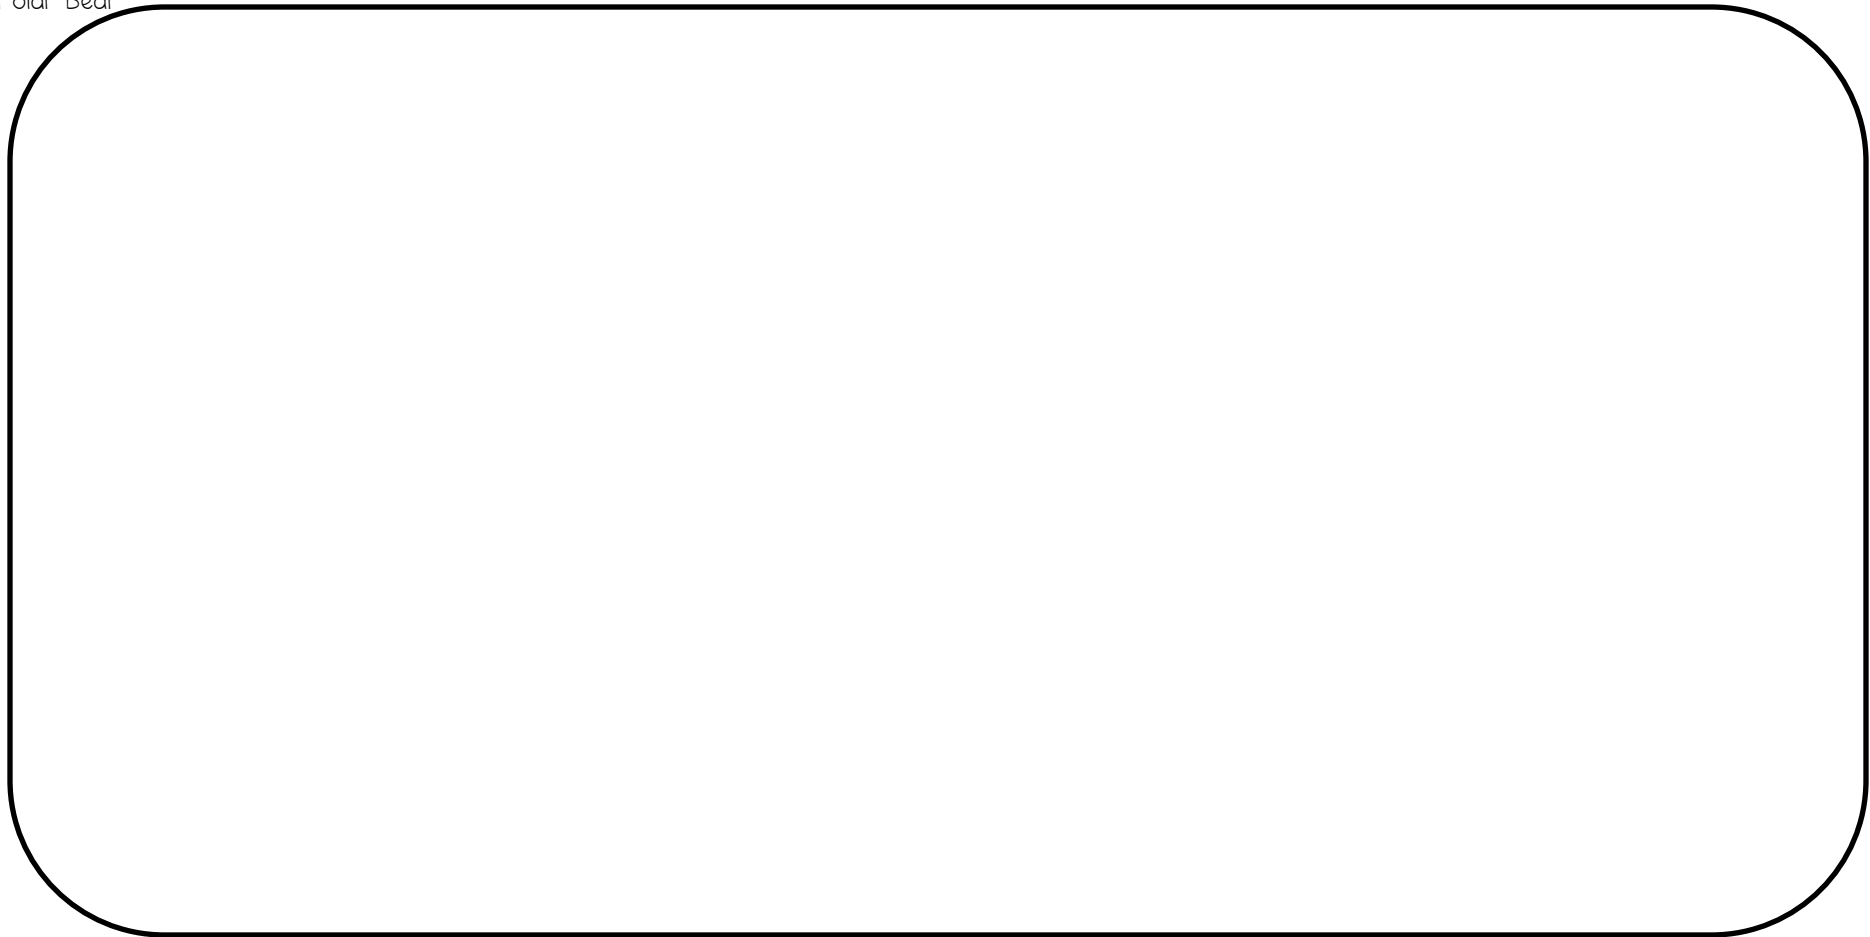

Polar bears live in the Arctic.

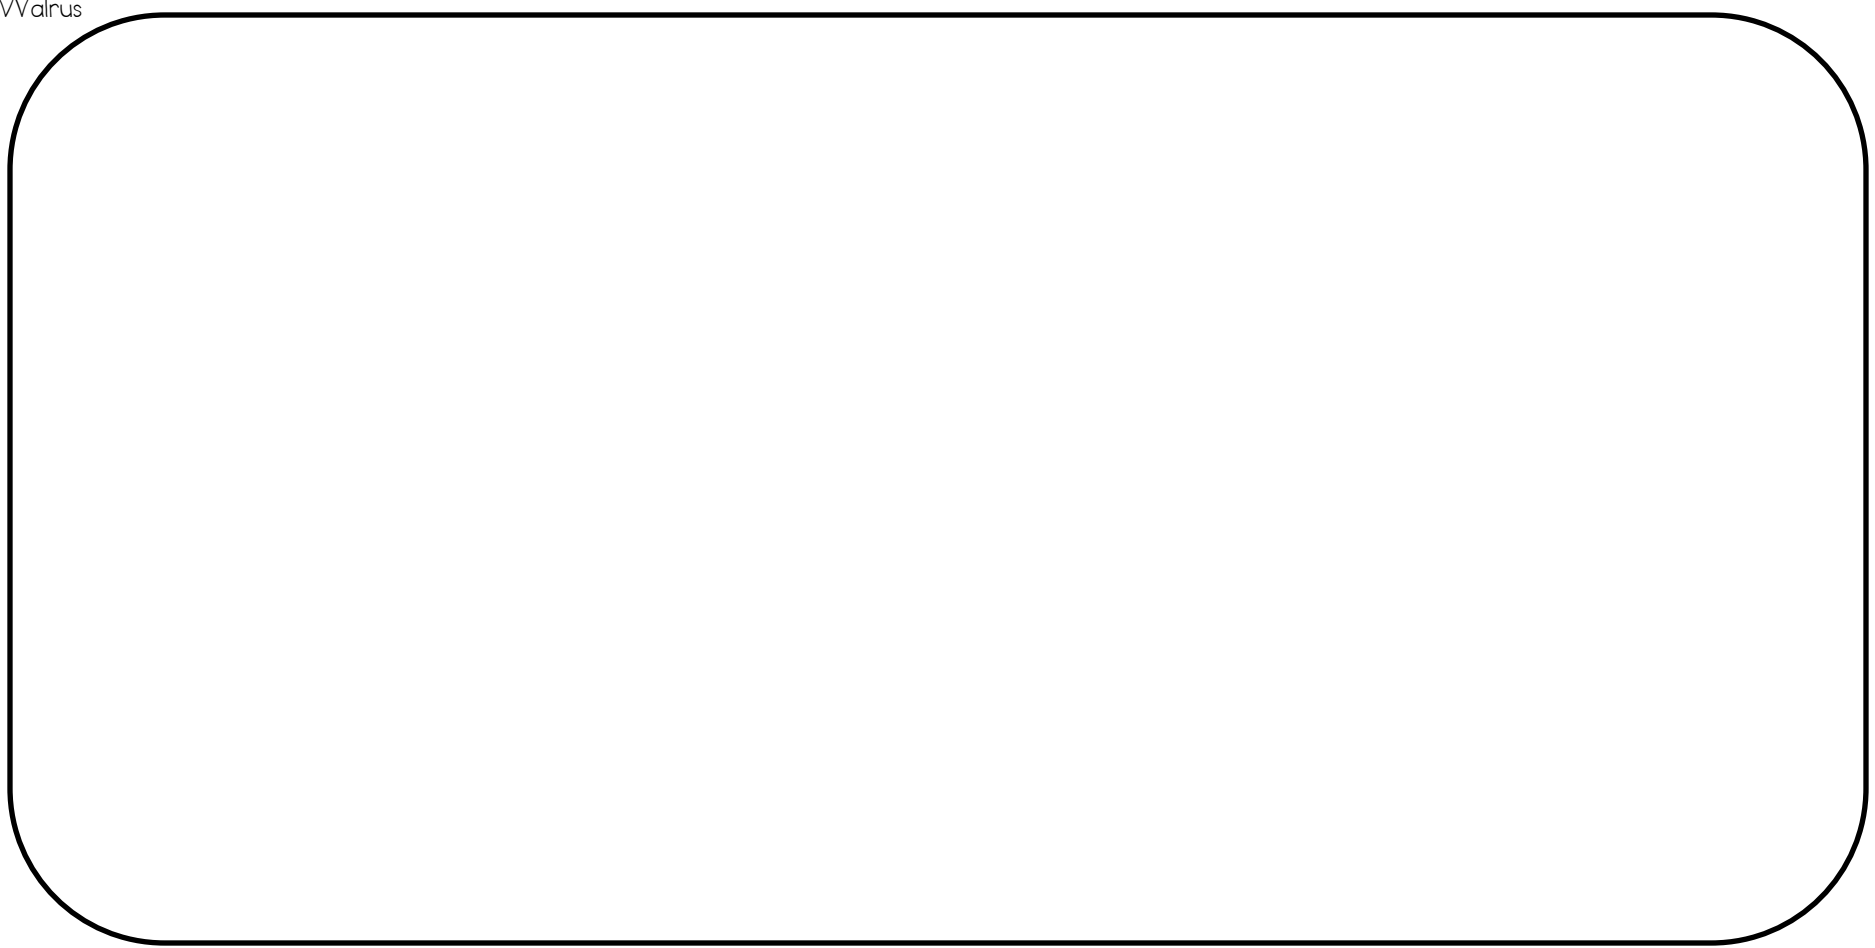

Thick fur keeps them warm. They

are strong swimmers. They swim

in the icy oceans.

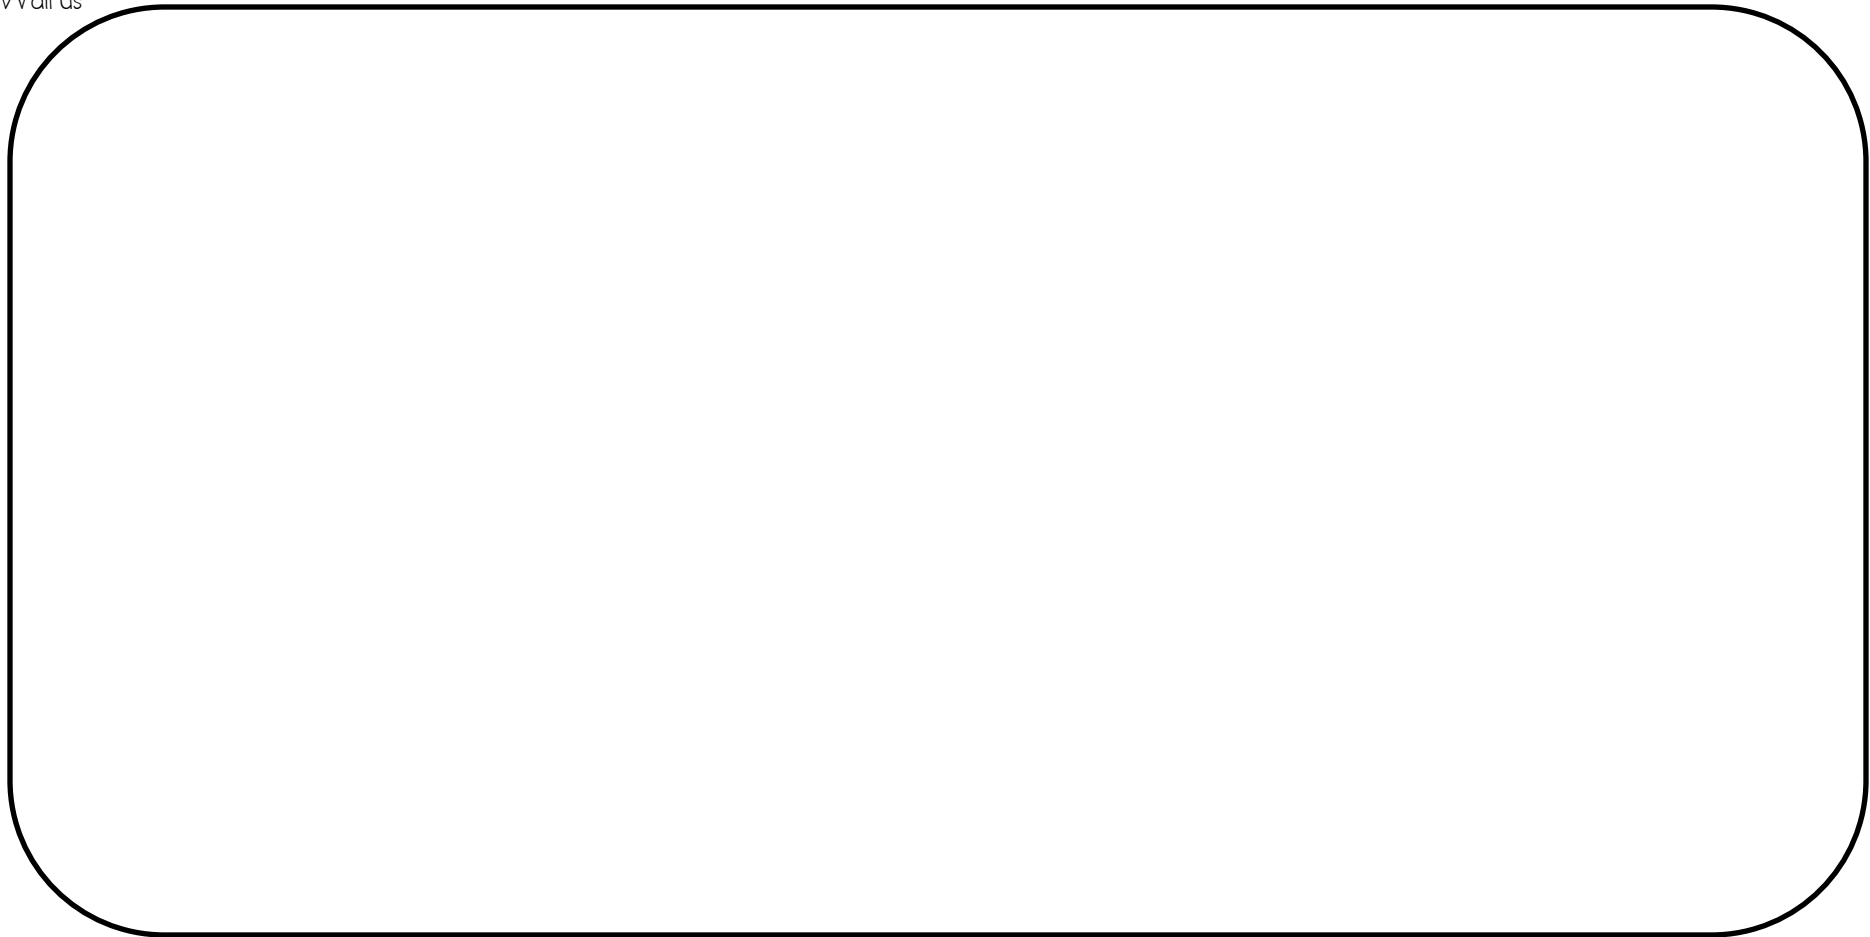

Handwriting practice lines consisting of seven sets of three horizontal lines (top, middle dashed, bottom) for writing practice. Some lines have a small black dot at the end.

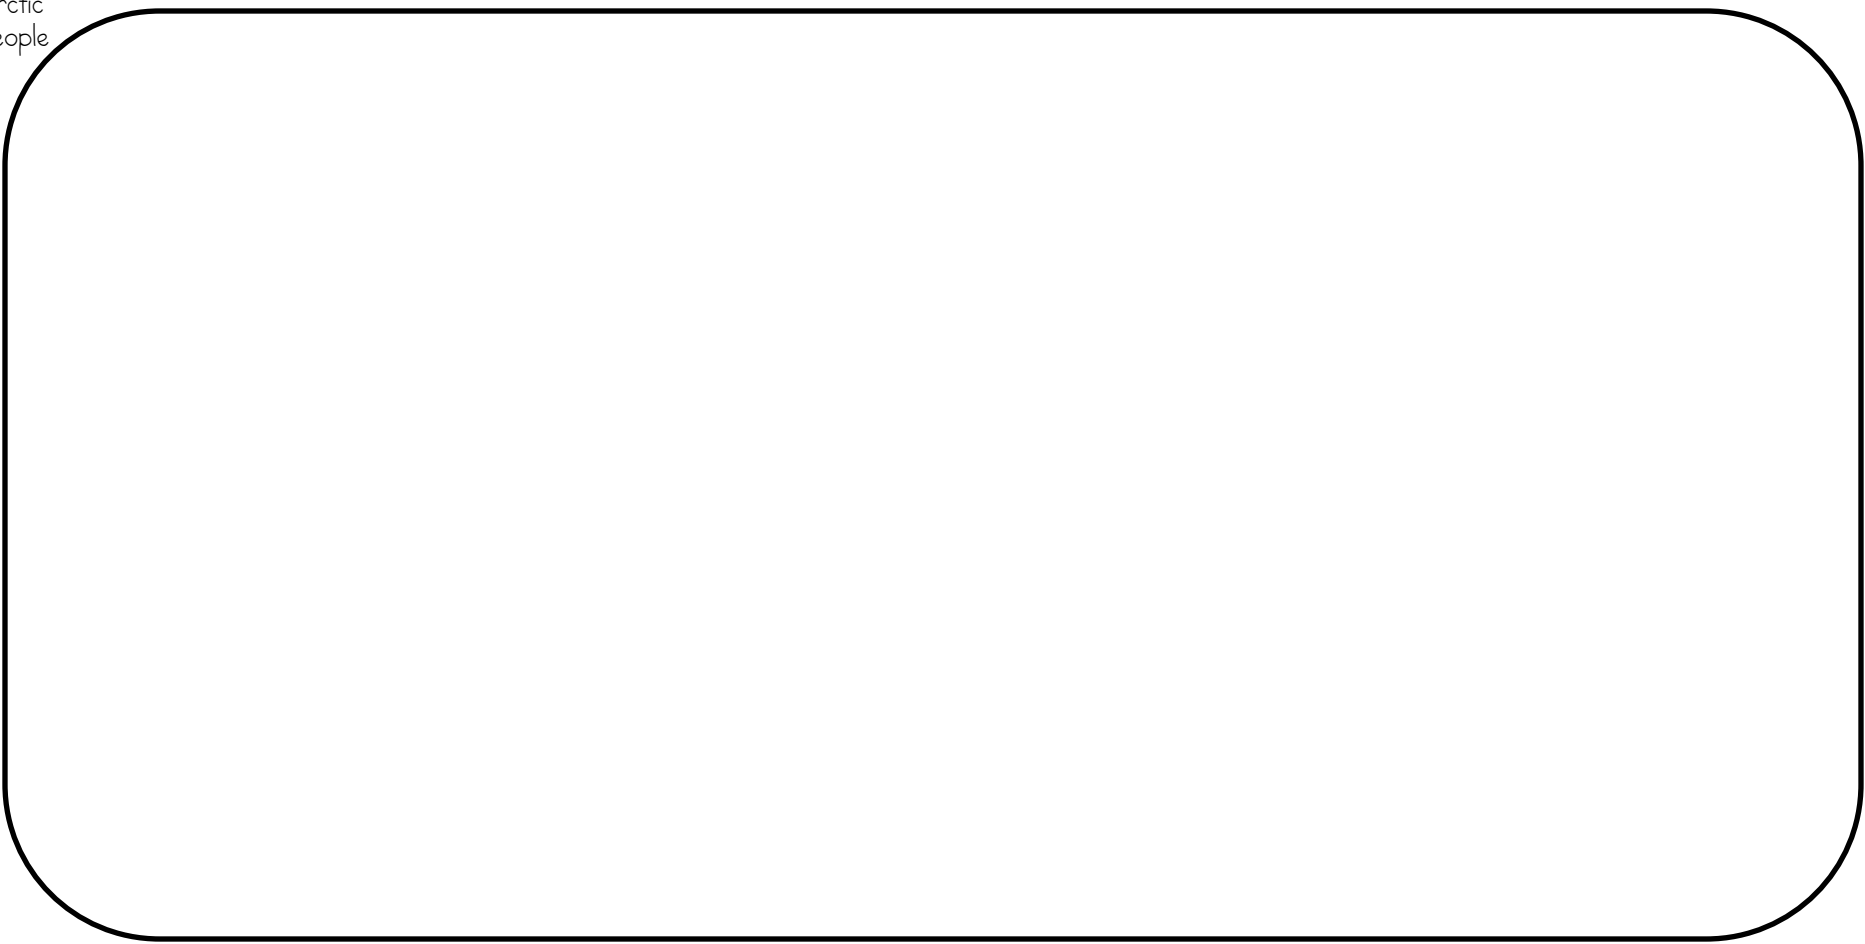

Walrus live in Arctic waters.

They swim under the ice. They like
to lie in the sunshine. They rest on
the drifting ice.

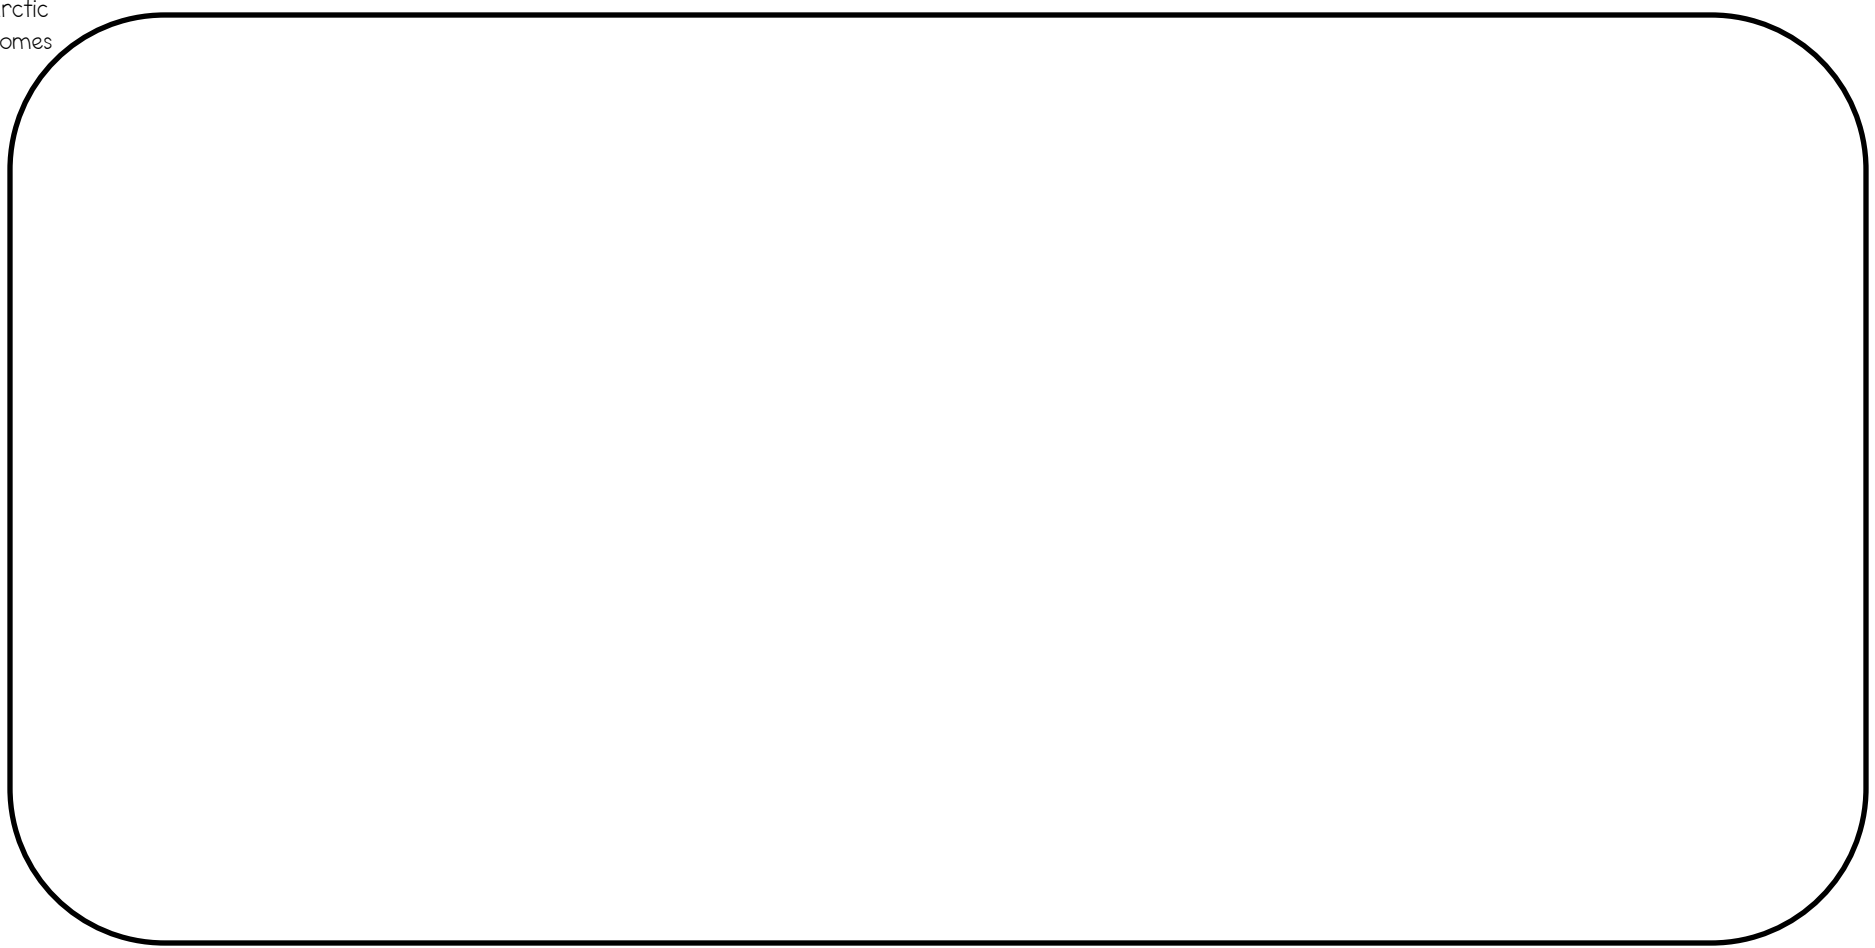

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot on the top line to indicate the starting point for writing.

People live in the Arctic. They
work and play there. Arctic
winters are very cold. People
dress in warm clothes.

Handwriting practice lines consisting of multiple rows of three horizontal lines each (top, middle dashed, bottom). Each row begins with a small black dot on the bottom line to indicate the starting point for writing.

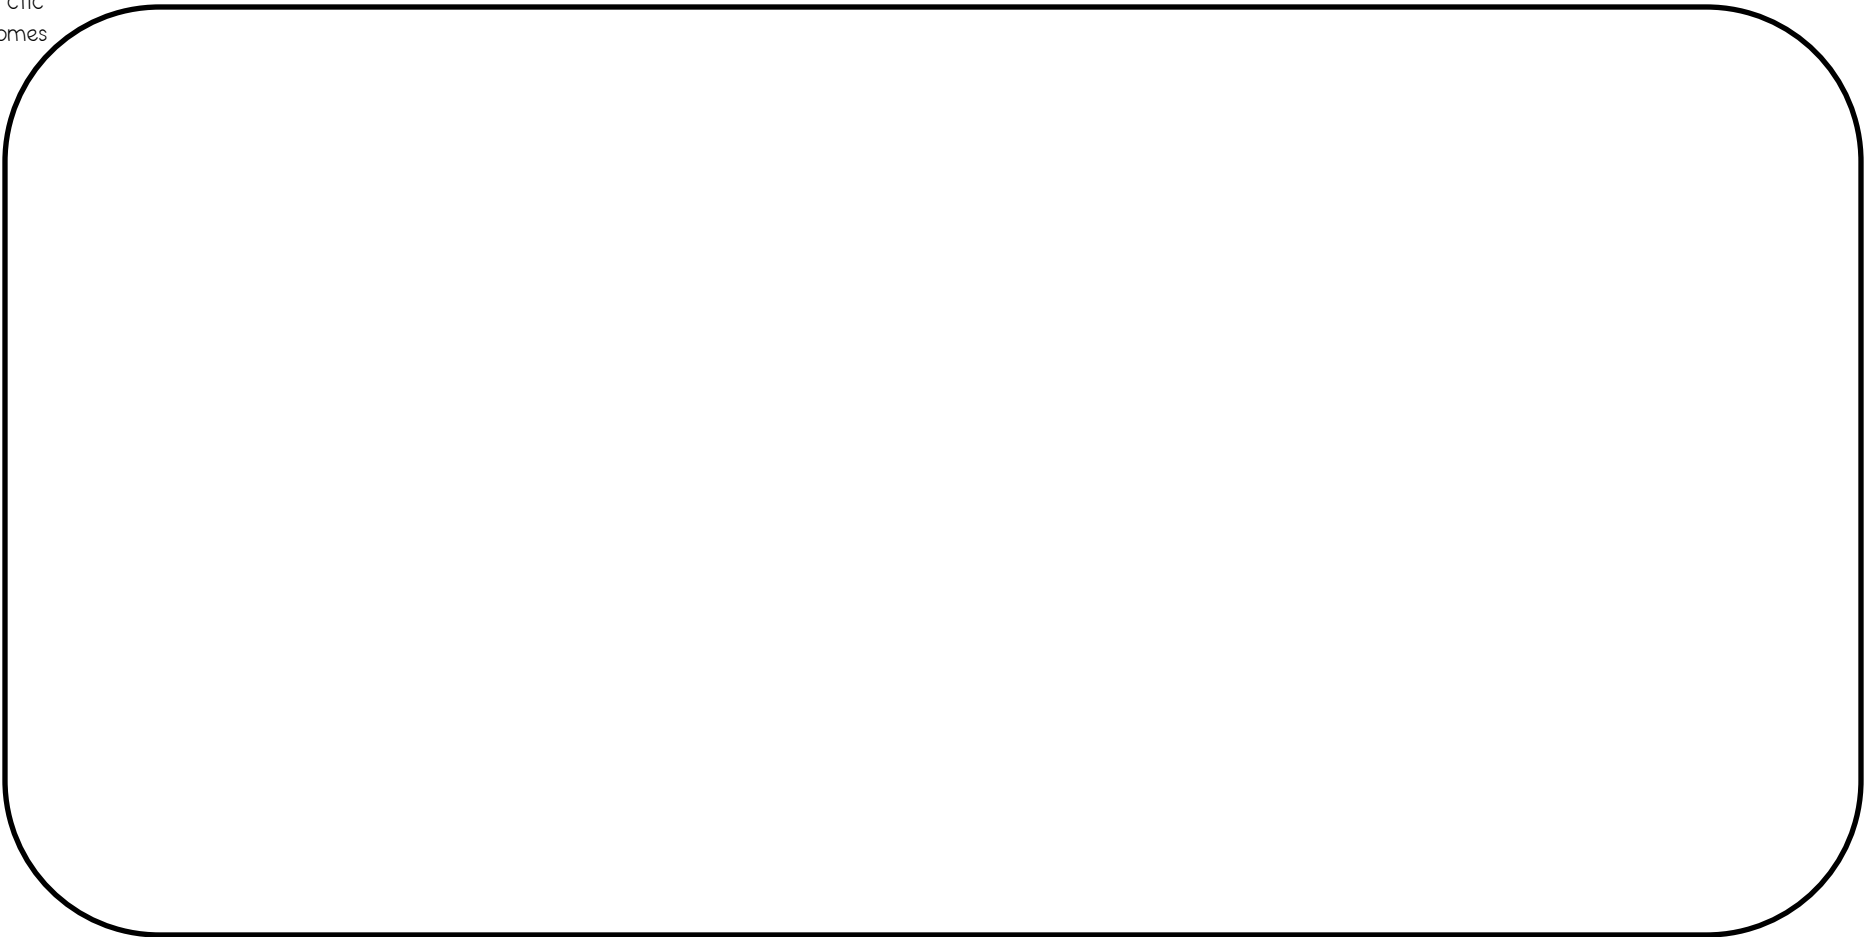

Arctic people build warm homes.

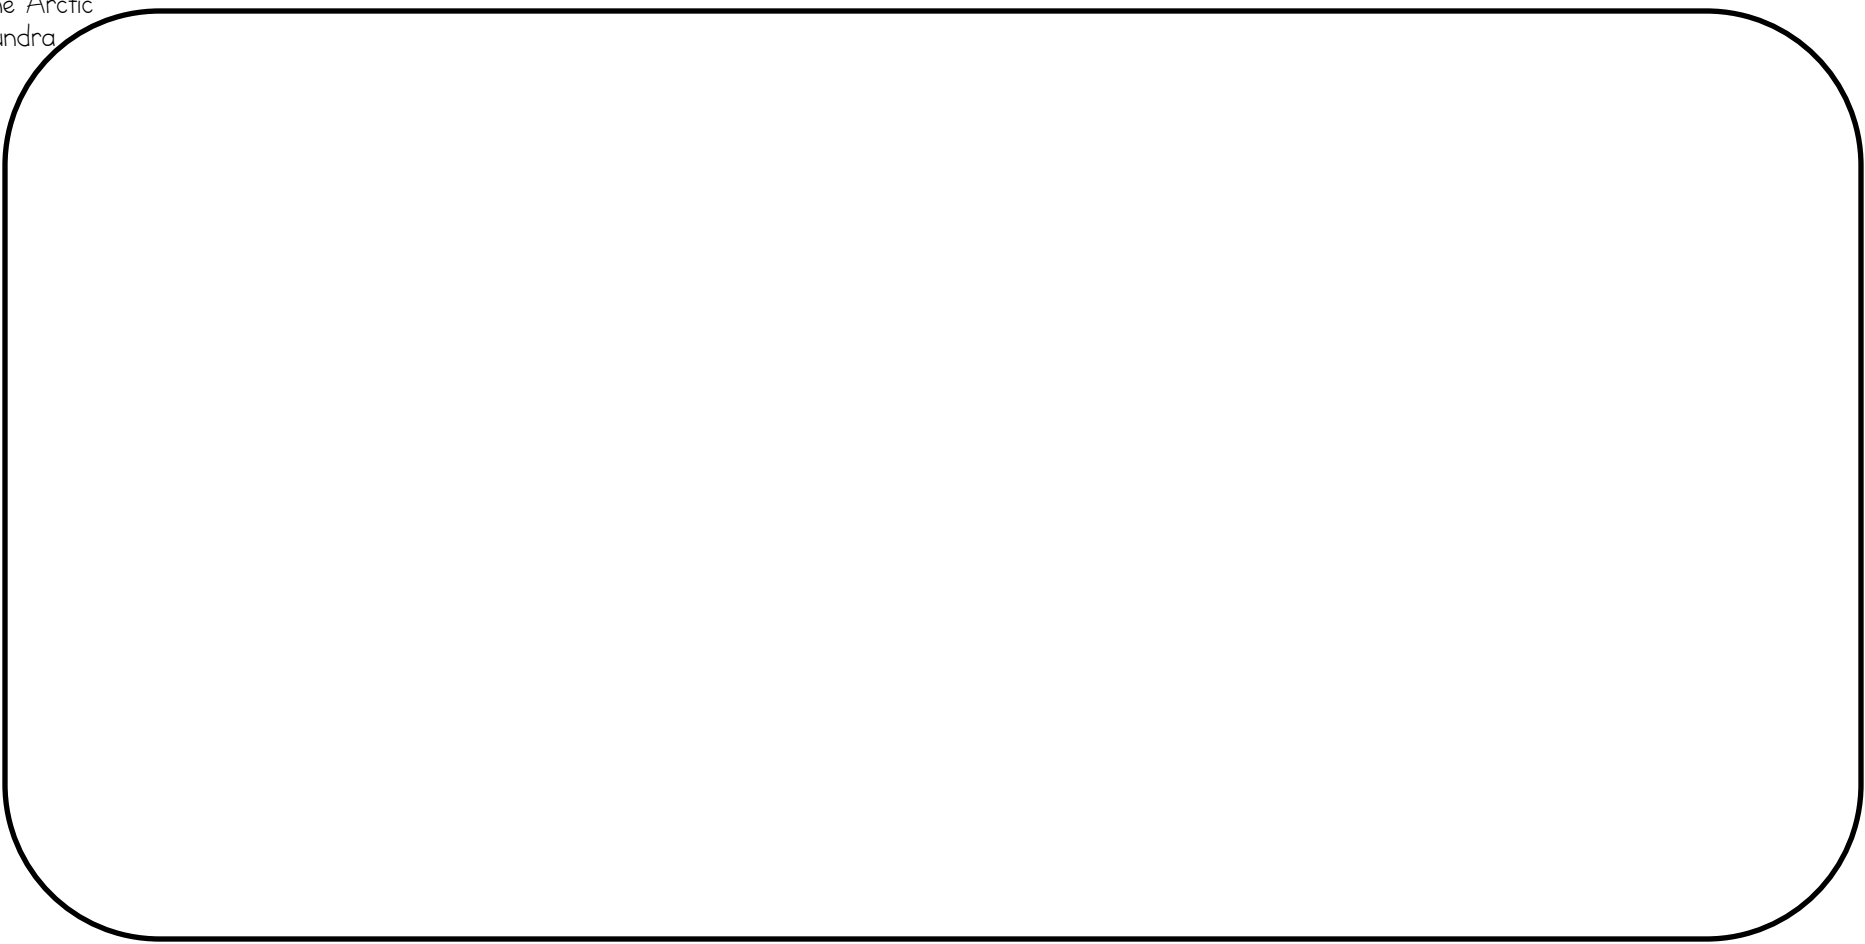

Most live in modern houses. Once,

many people built igloos. Igloos

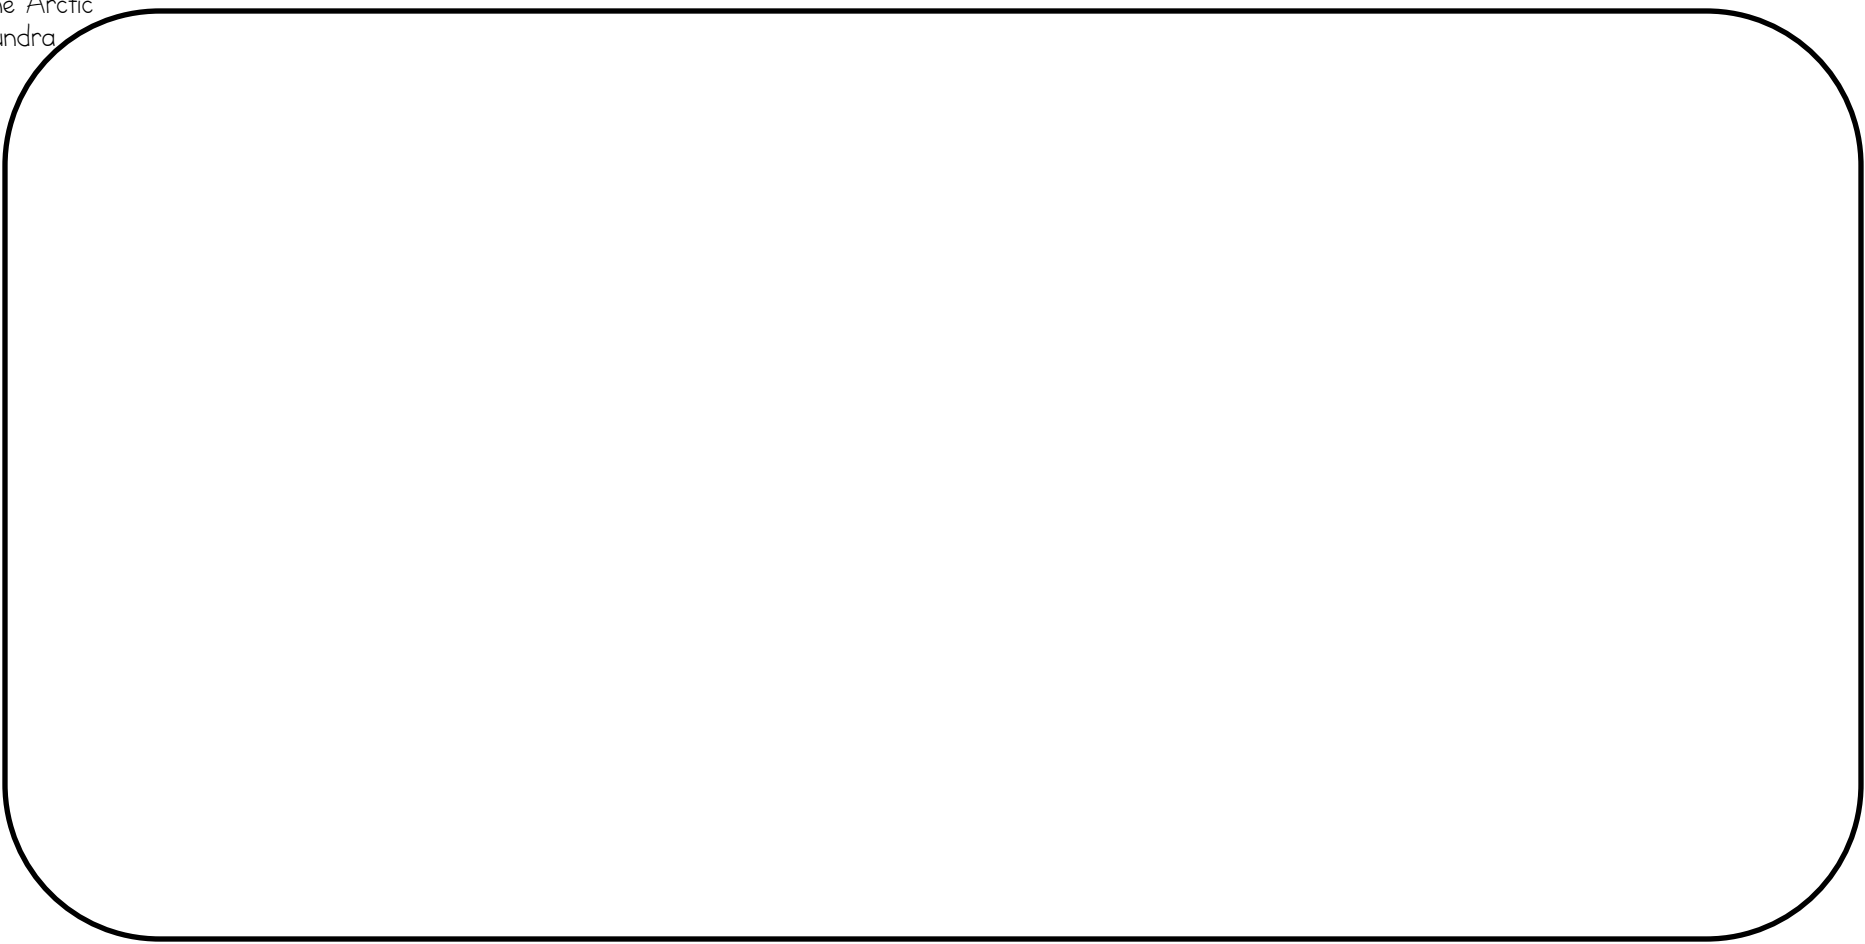

are shelters made of snow.

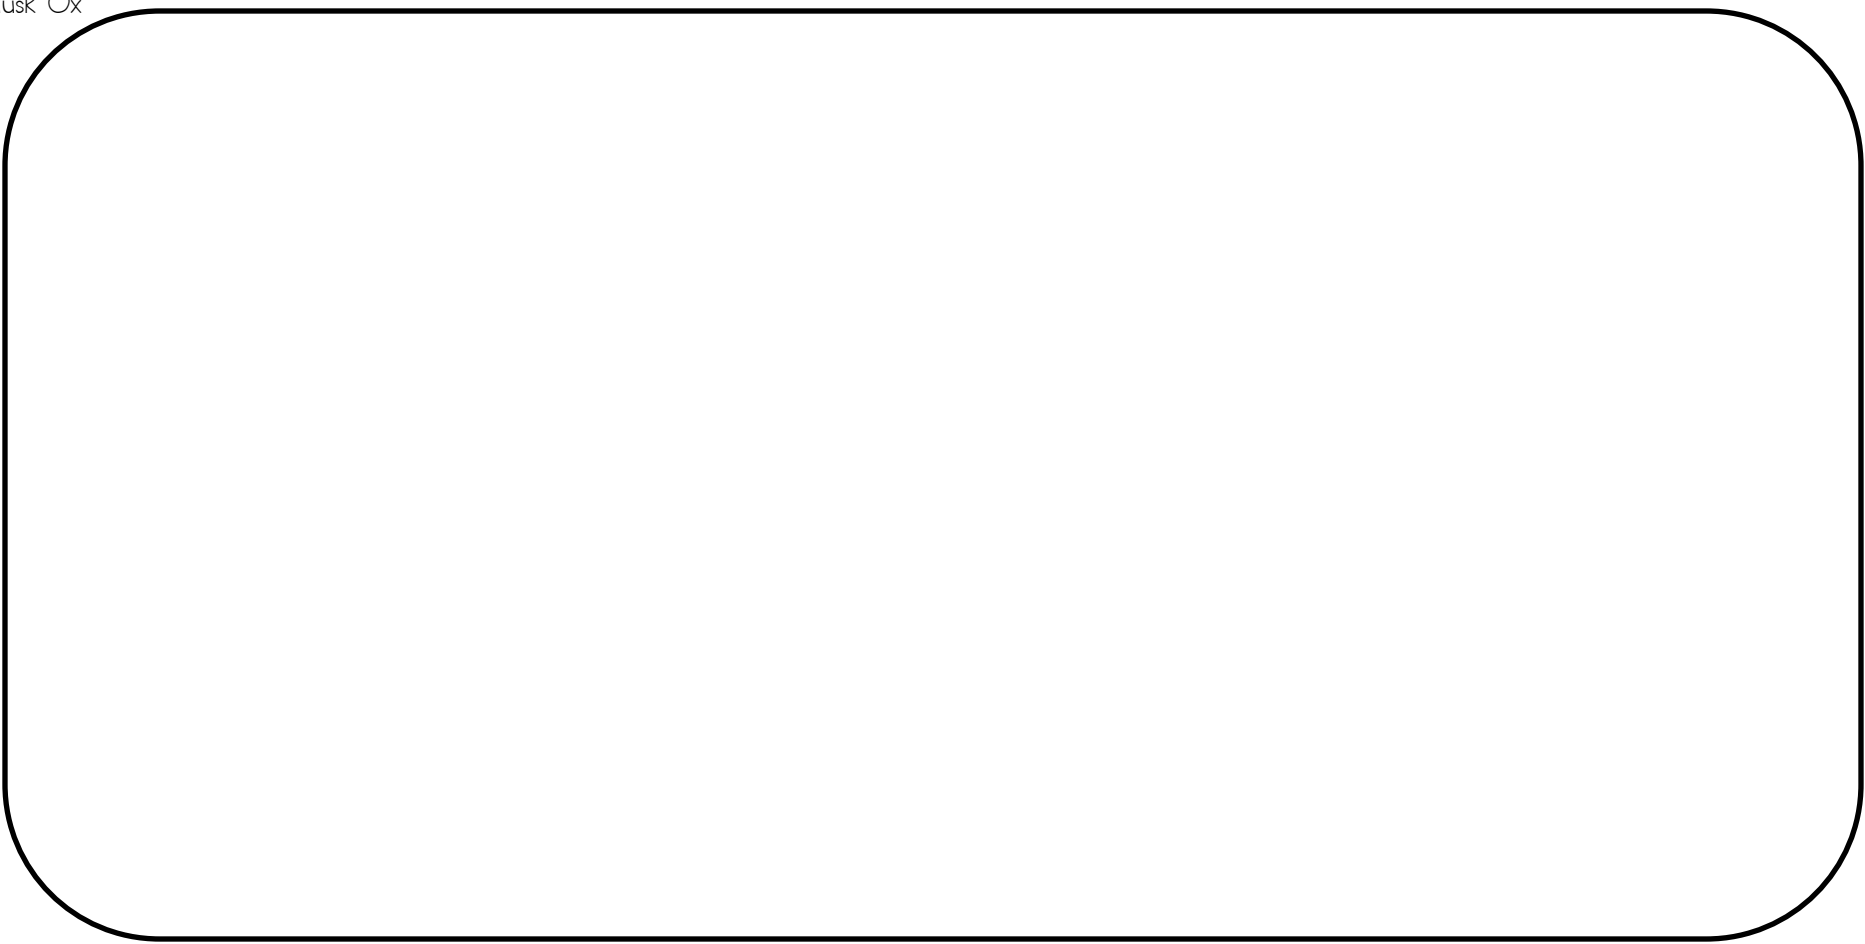

Six sets of primary writing lines. Each set consists of a solid top line, a dashed middle line, and a solid bottom line. The lines are spaced evenly across the bottom of the page.

The tundra is frozen in winter. It
comes alive in summer. The snow
and ice melt. Plants bloom and
insects hatch.

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot for starting a letter.

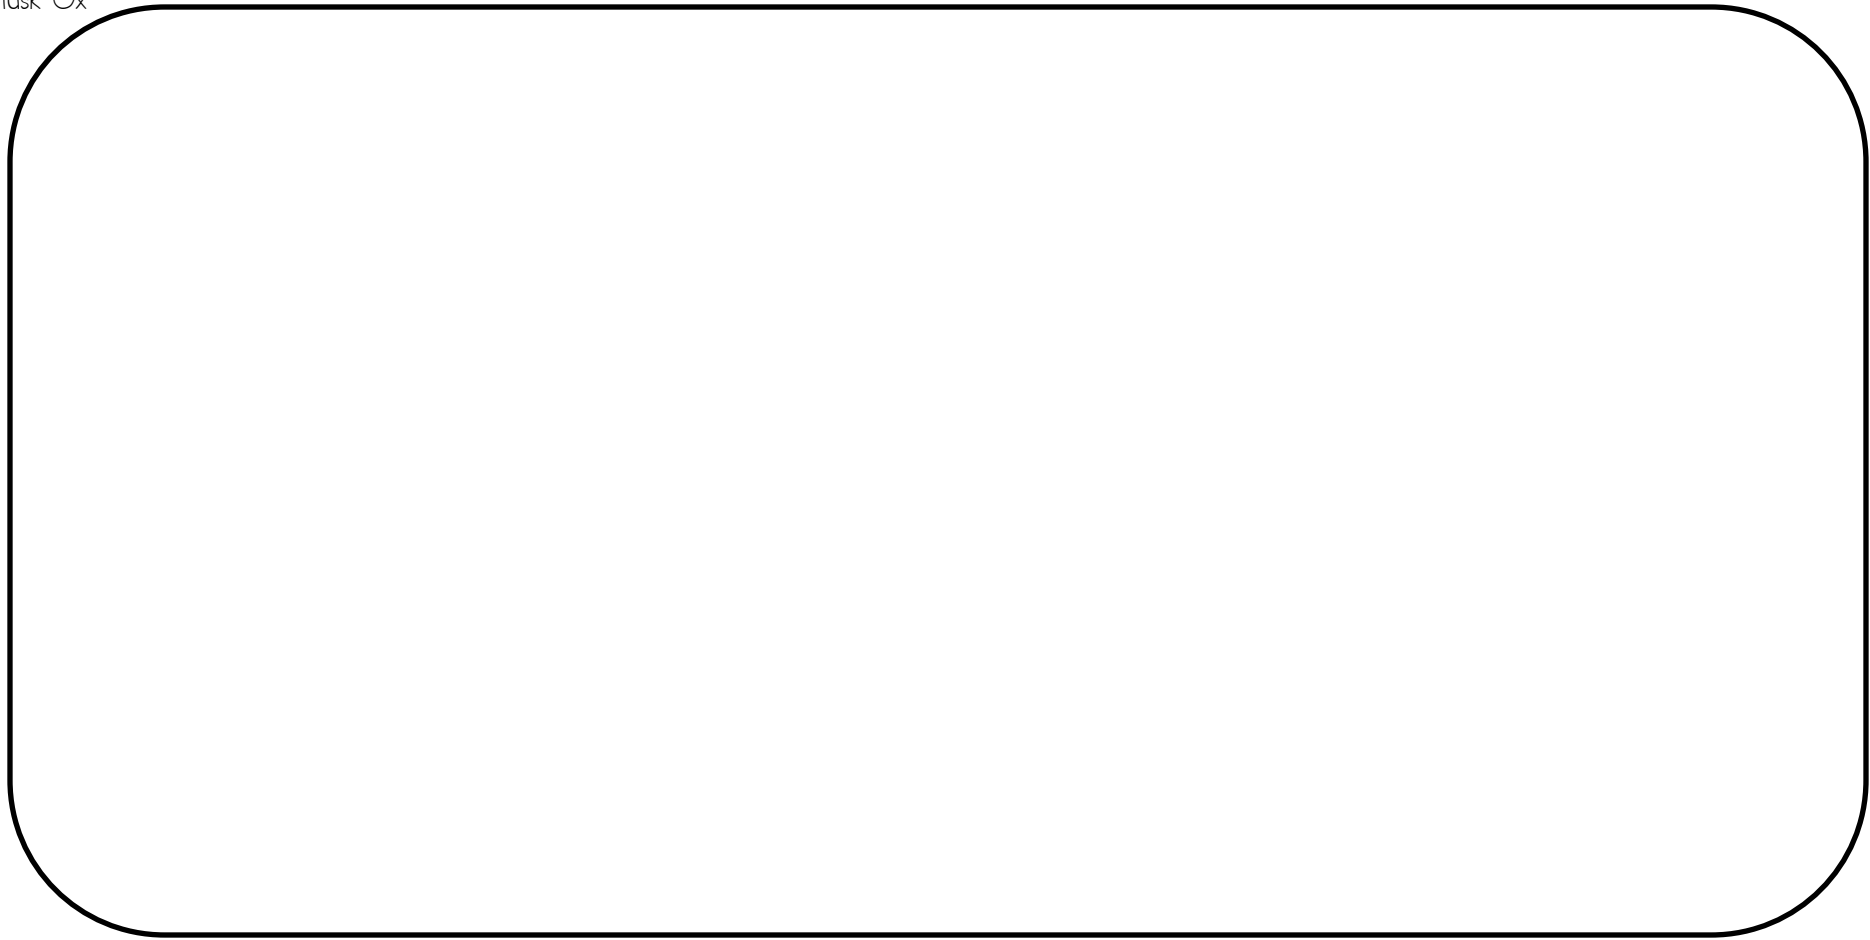

Musk oxen stay on the tundra.

They live together in herds. They

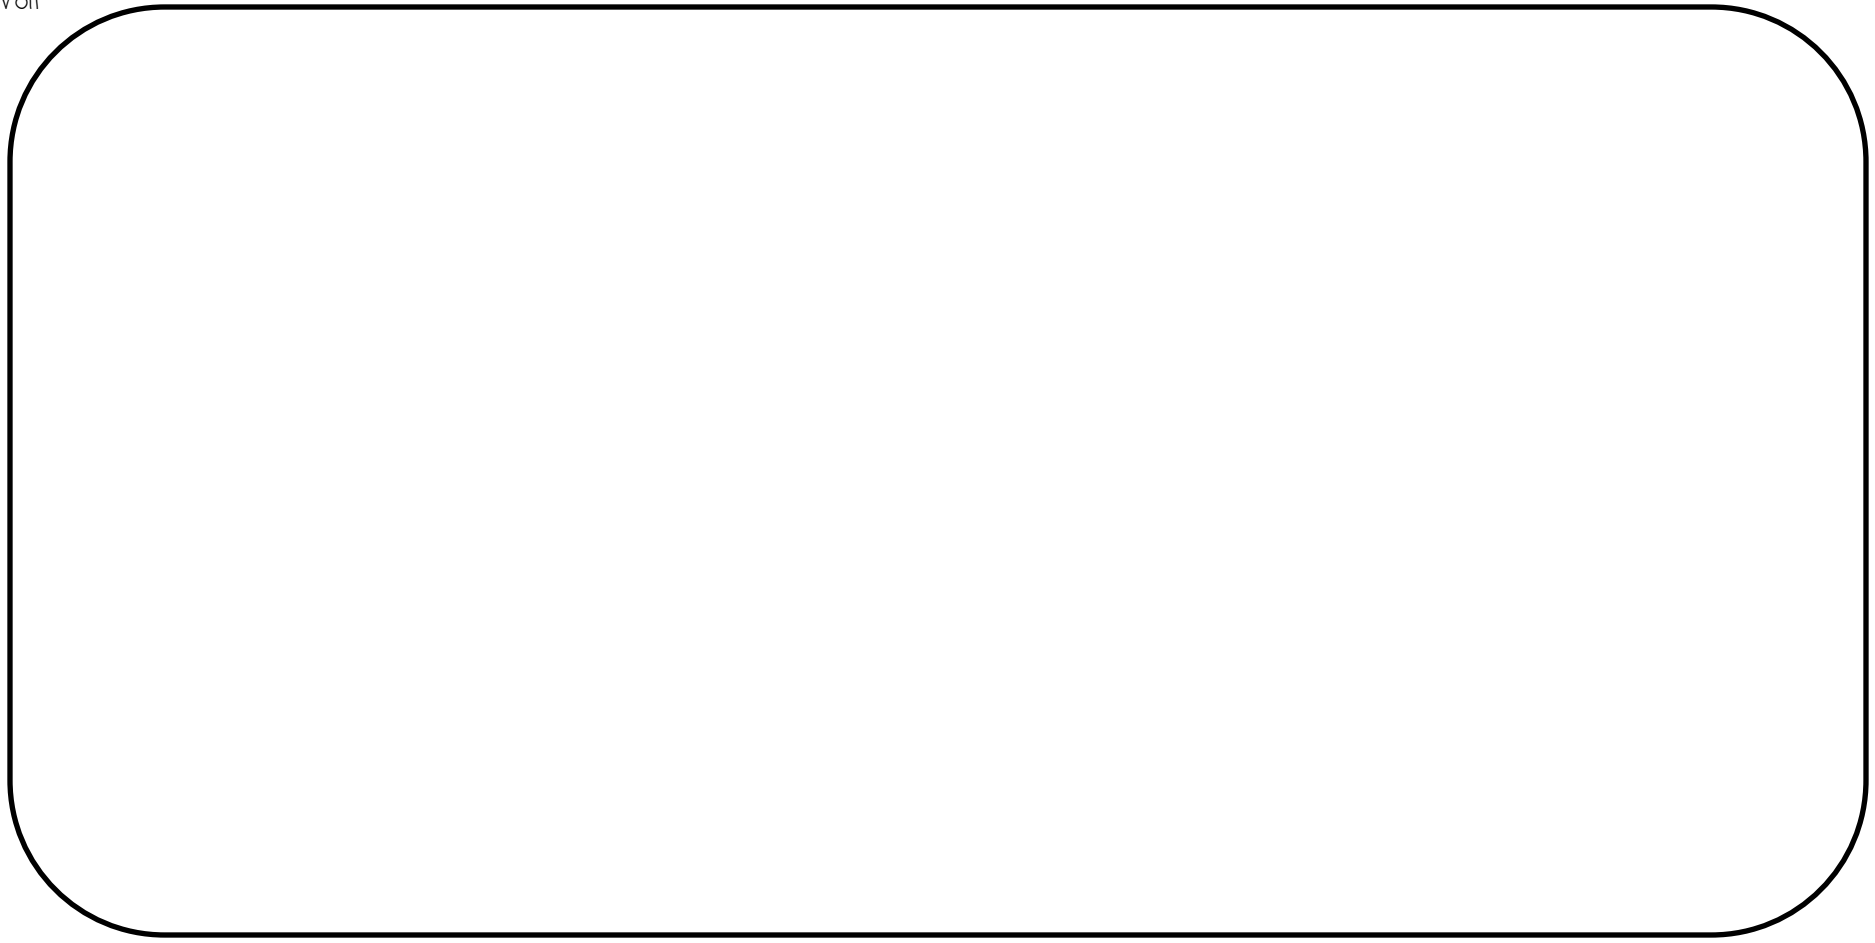

form a circle for safety. The

babies get in the center.

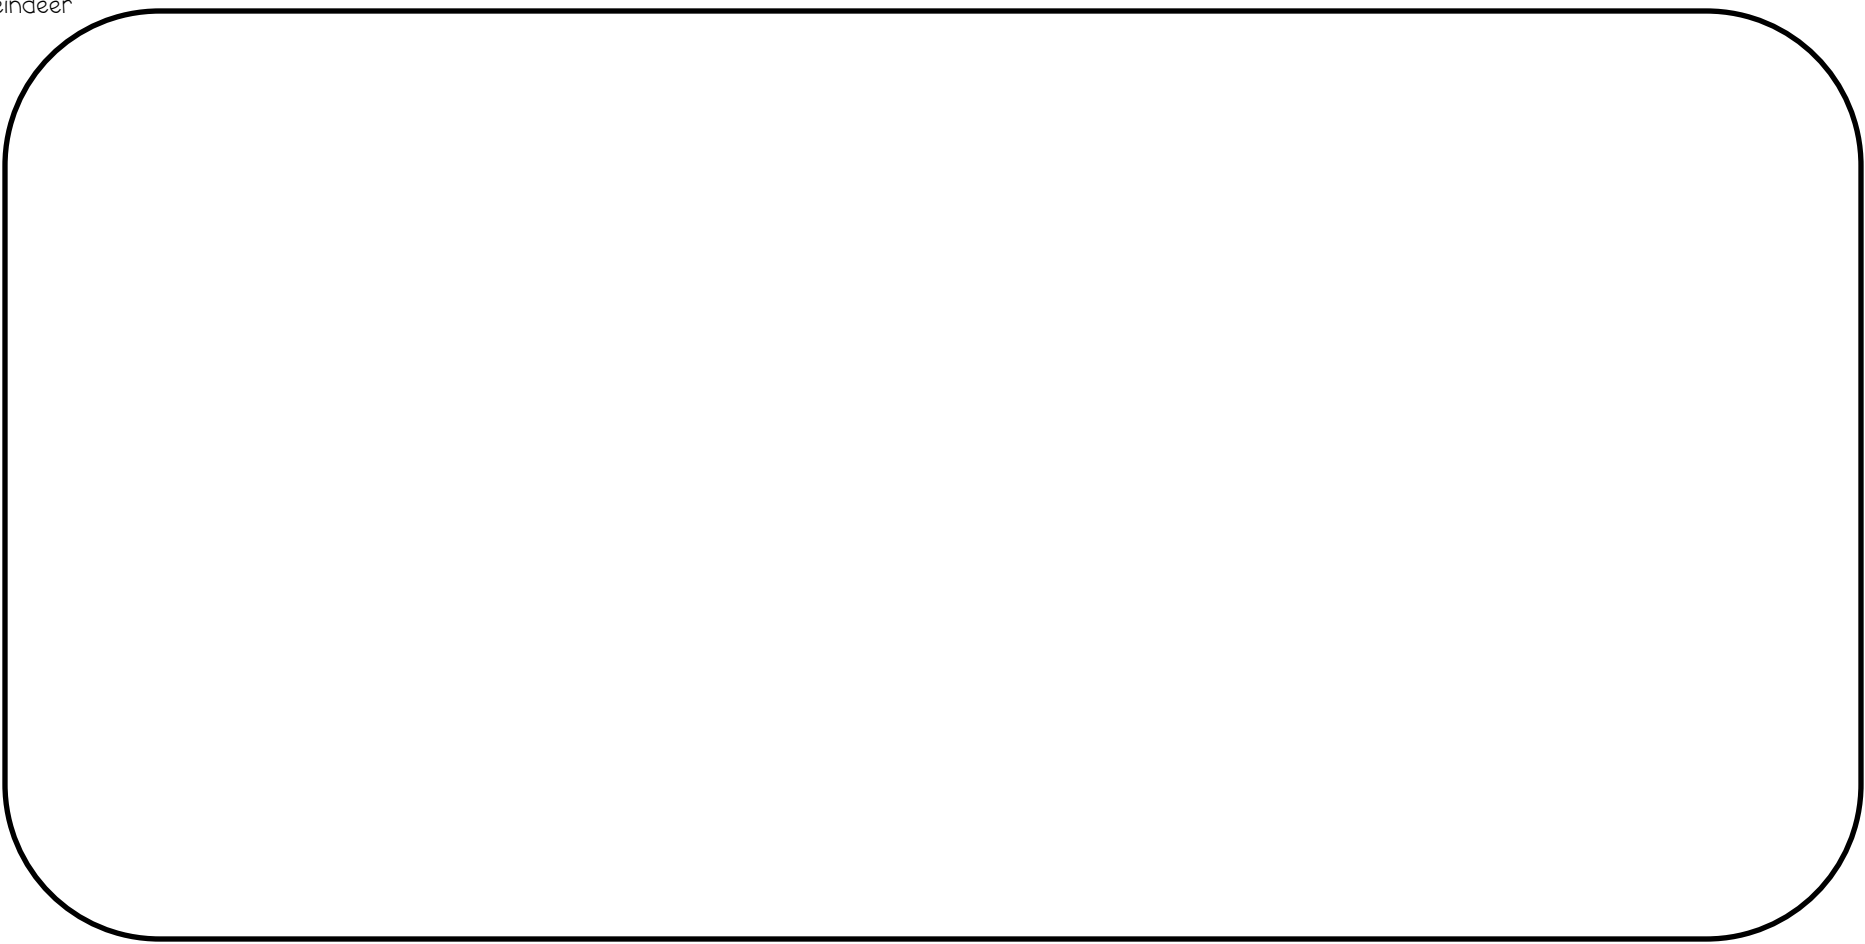

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot positioned at the end of the top line, serving as a starting point for writing.

Wolves live in the Arctic. Some
live near the forests. Others live
farther north. The northern
wolves are white.

Handwriting practice lines consisting of six rows of three columns. Each row has a solid top line, a dashed middle line, and a solid bottom line. Small black dots are placed on the bottom line of each row to indicate starting points for writing.

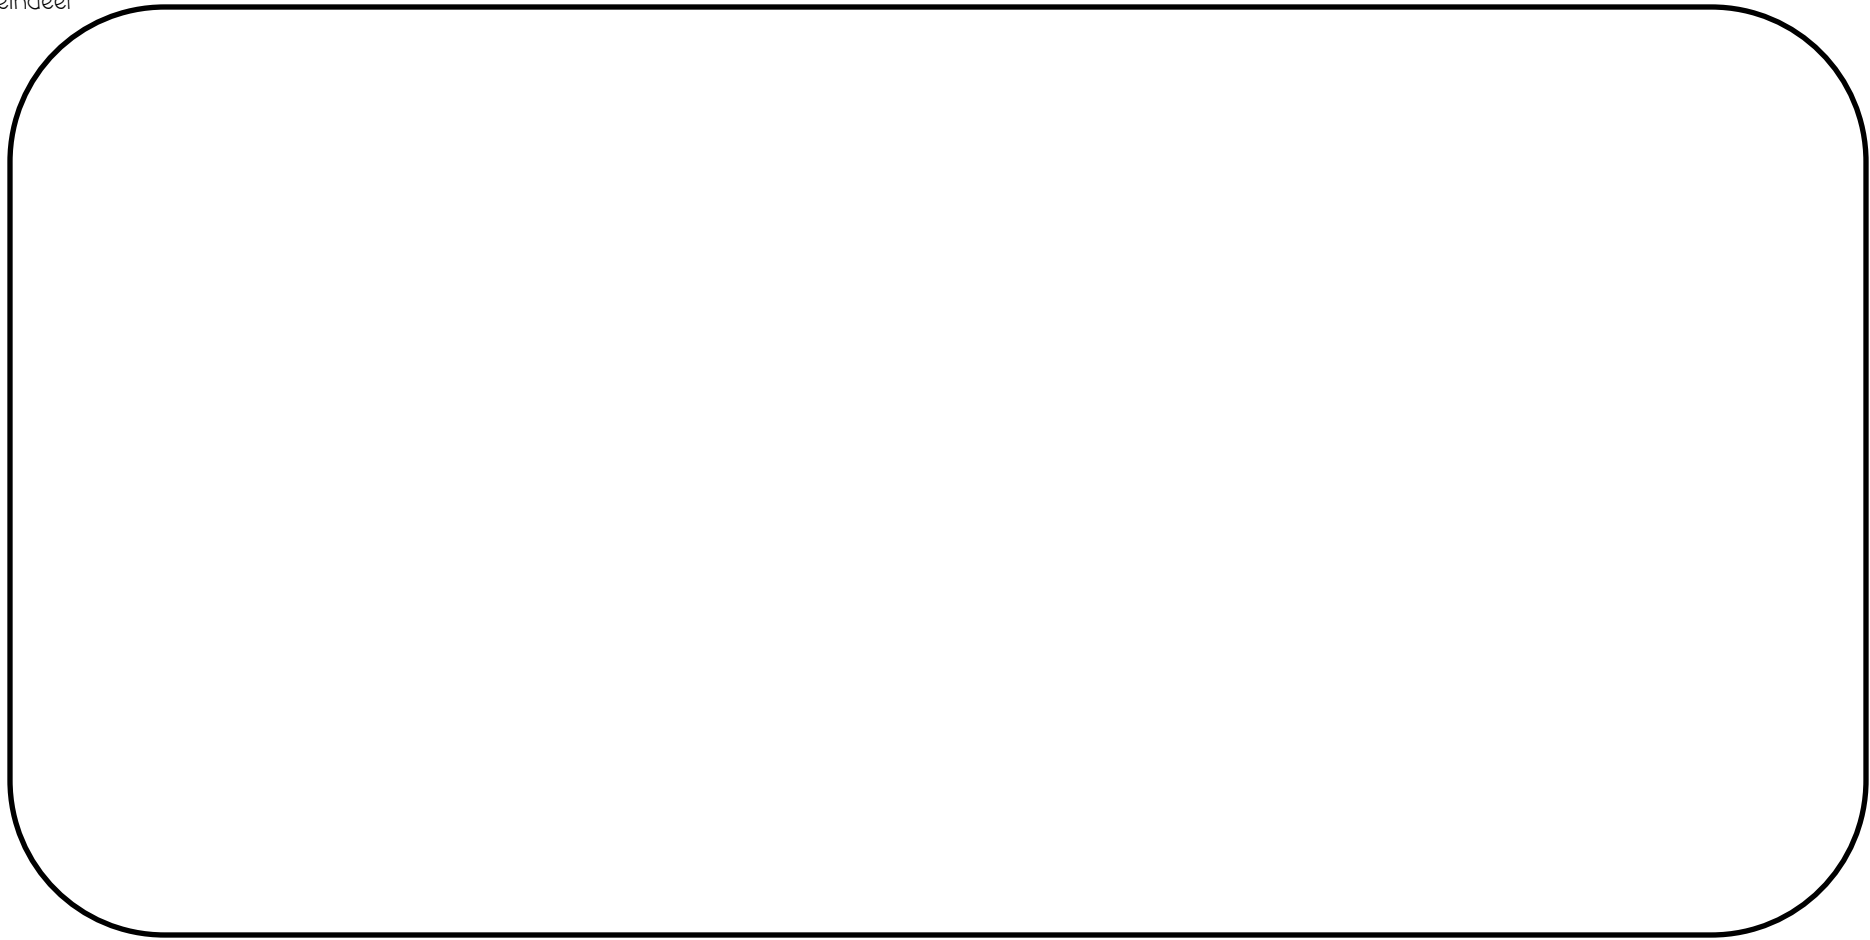

Reindeer live in Asia and Europe.

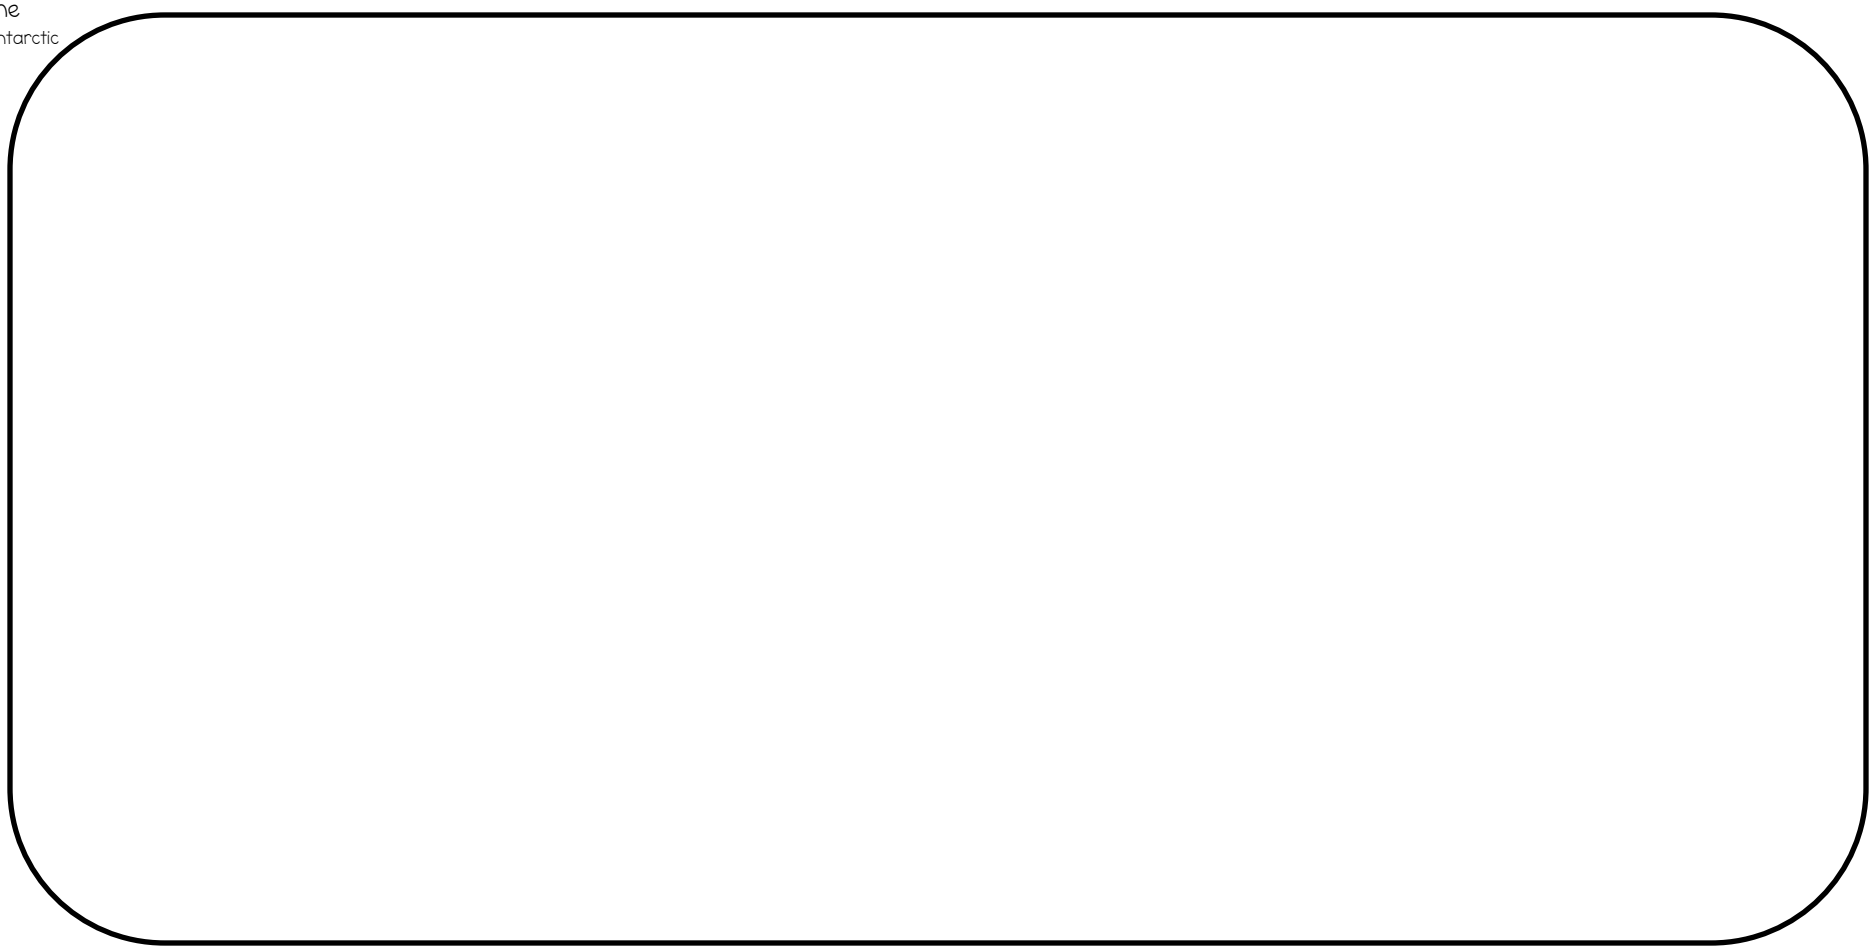

They might migrate to the tundra.

Reindeer live in herds. Some

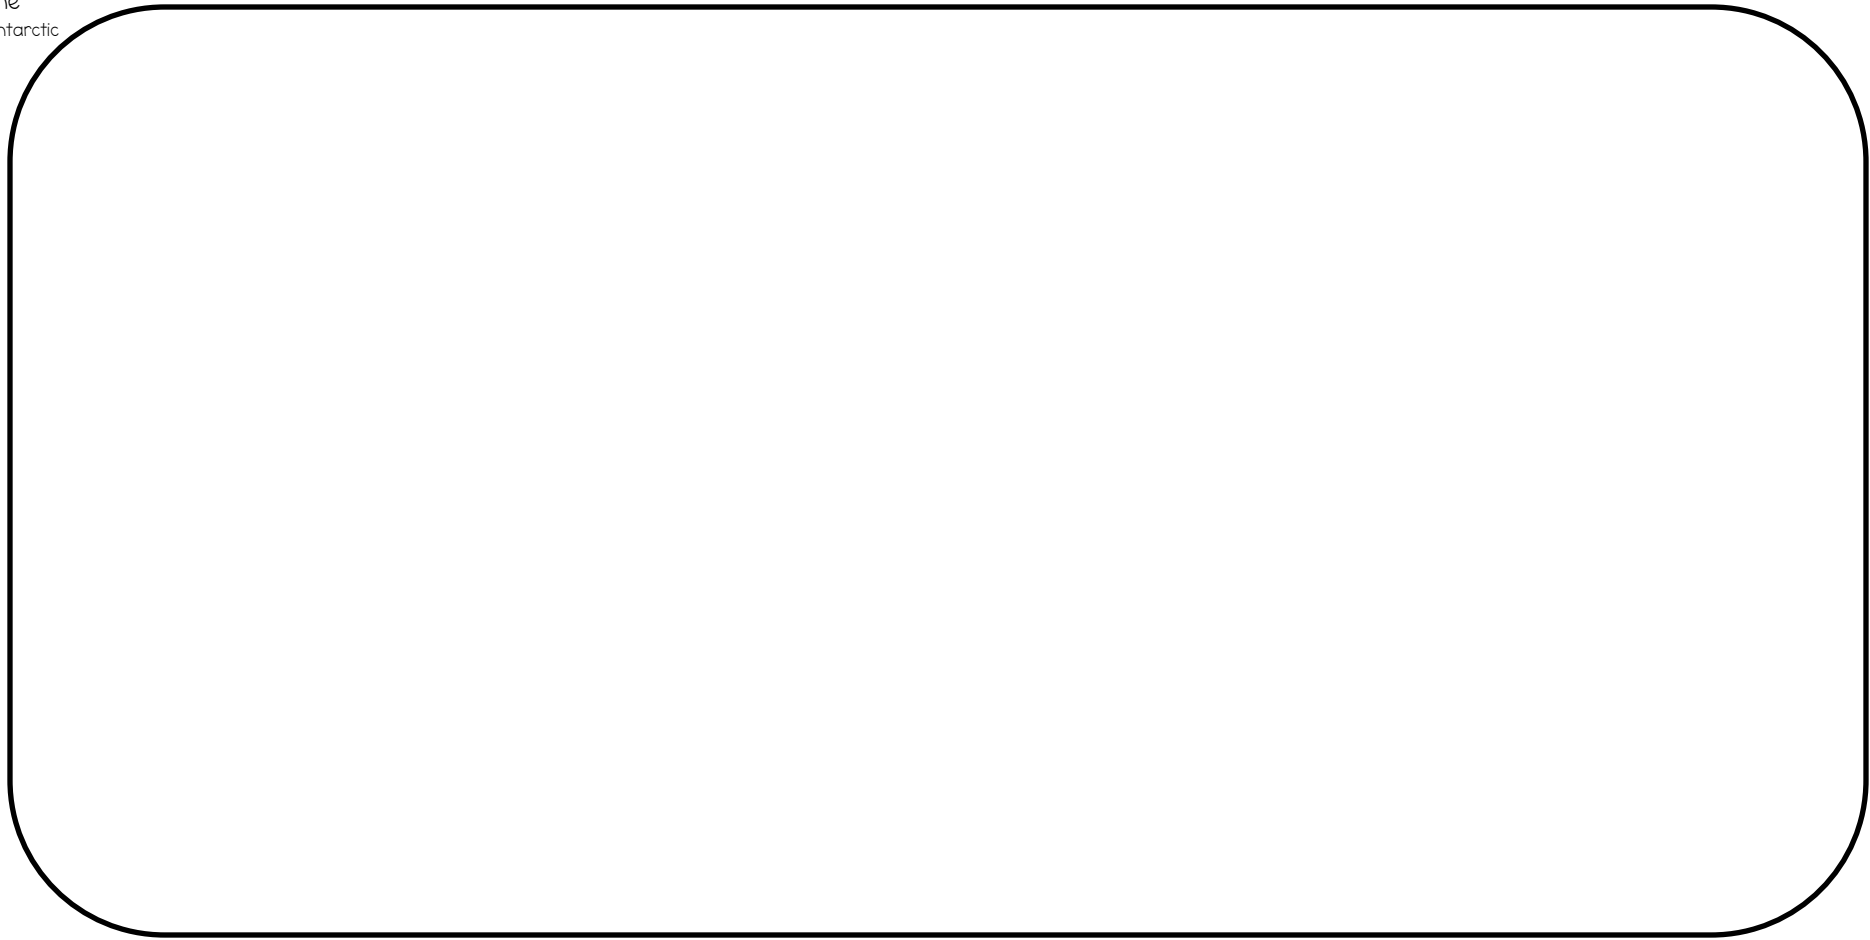

people tame them.

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot at the end of the line to indicate the starting point for writing.

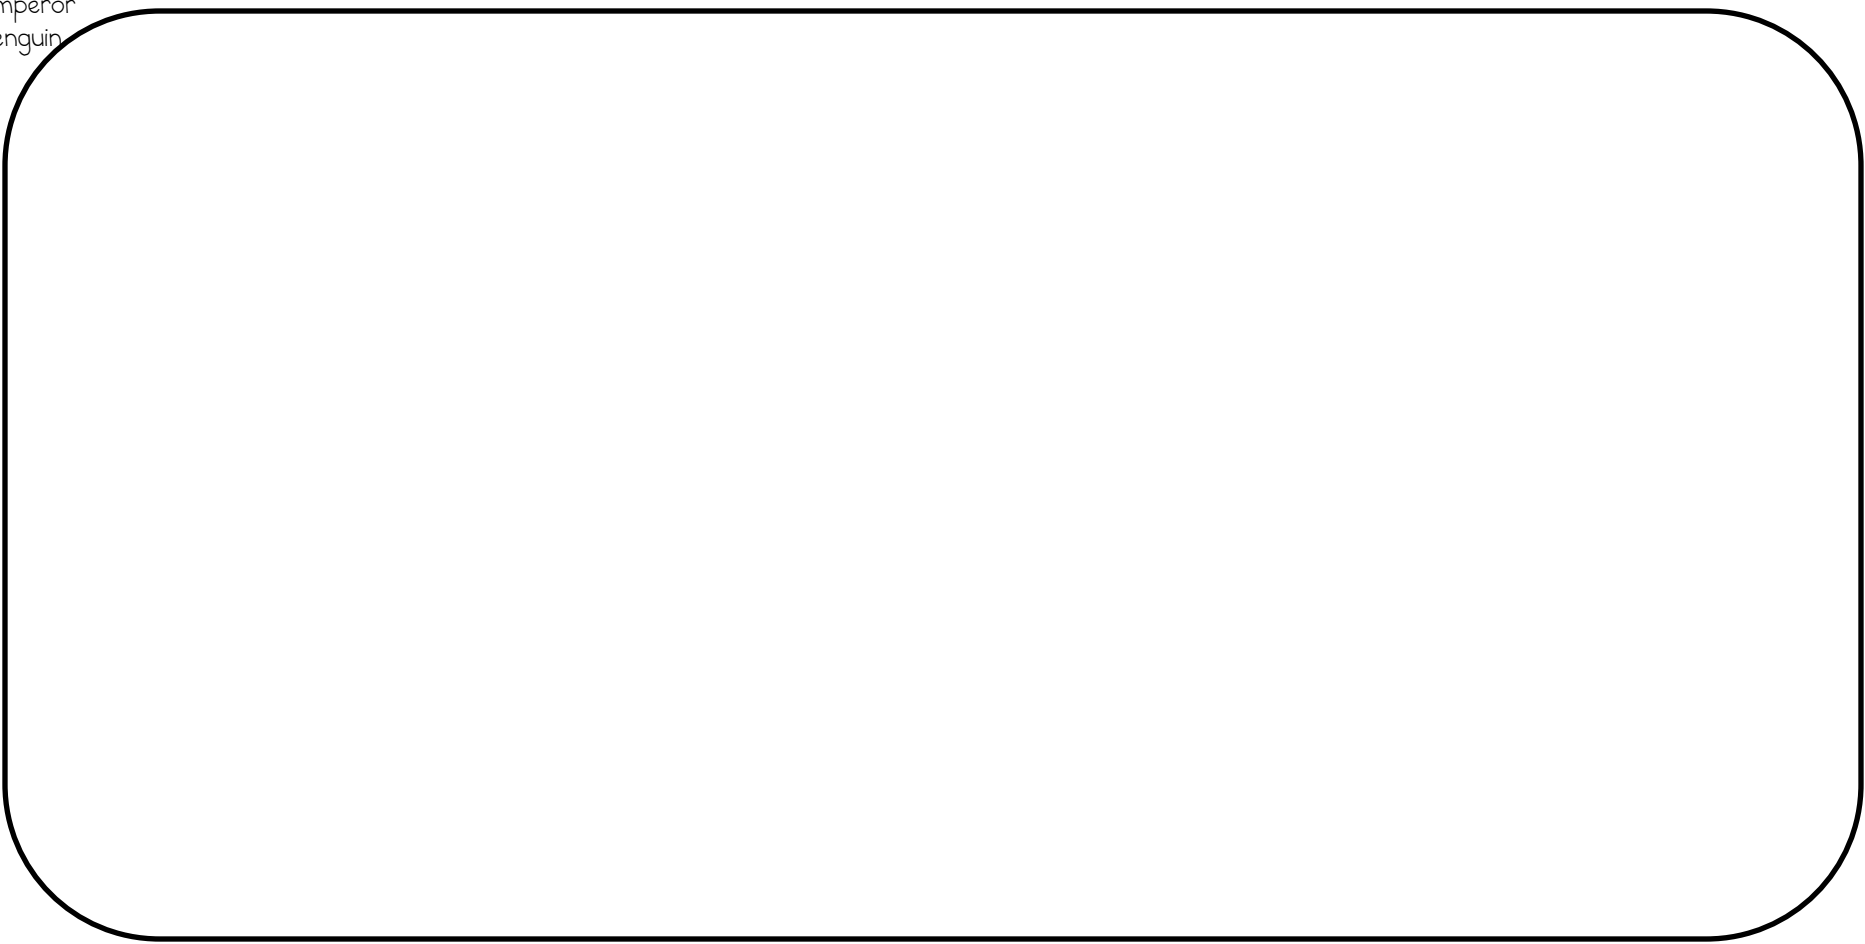

Antarctica is a continent. It is
surrounded by an ocean. The
ocean freezes in winter. The sea
ice melts in summer.

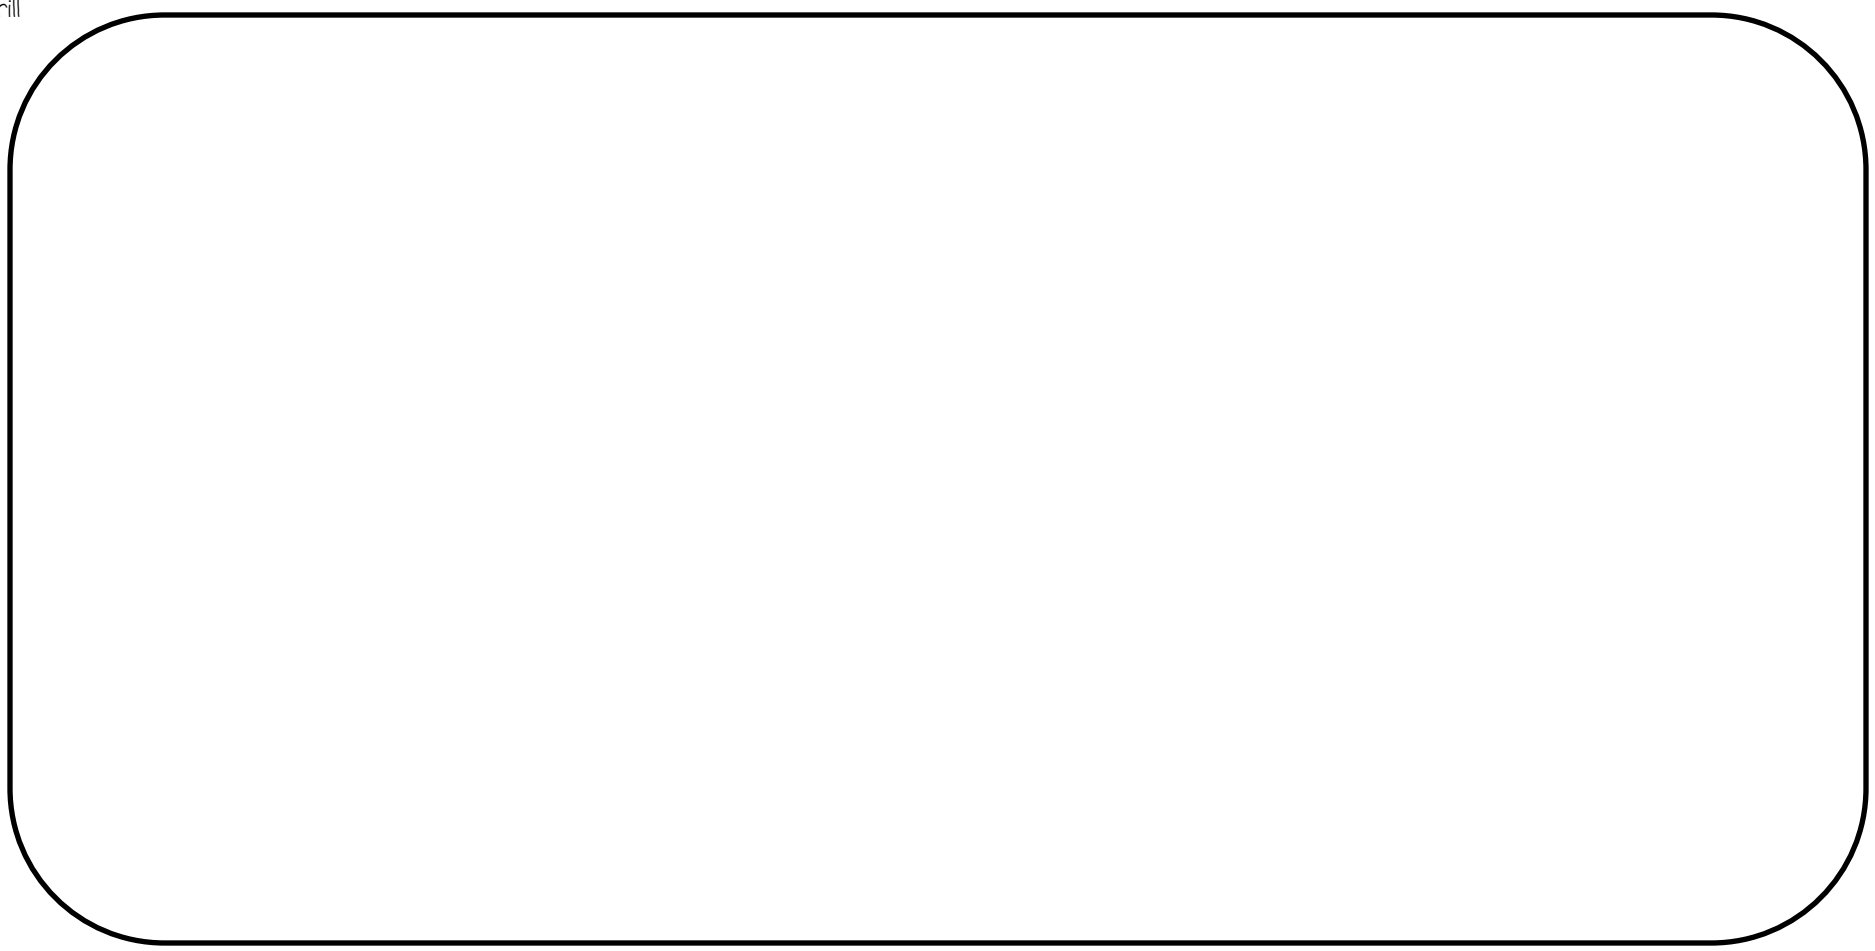

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot positioned on the top solid line to indicate the starting point for writing.

Emperor penguins are birds. They
are four feet tall. They swim but
do not fly. They live along the
coasts.

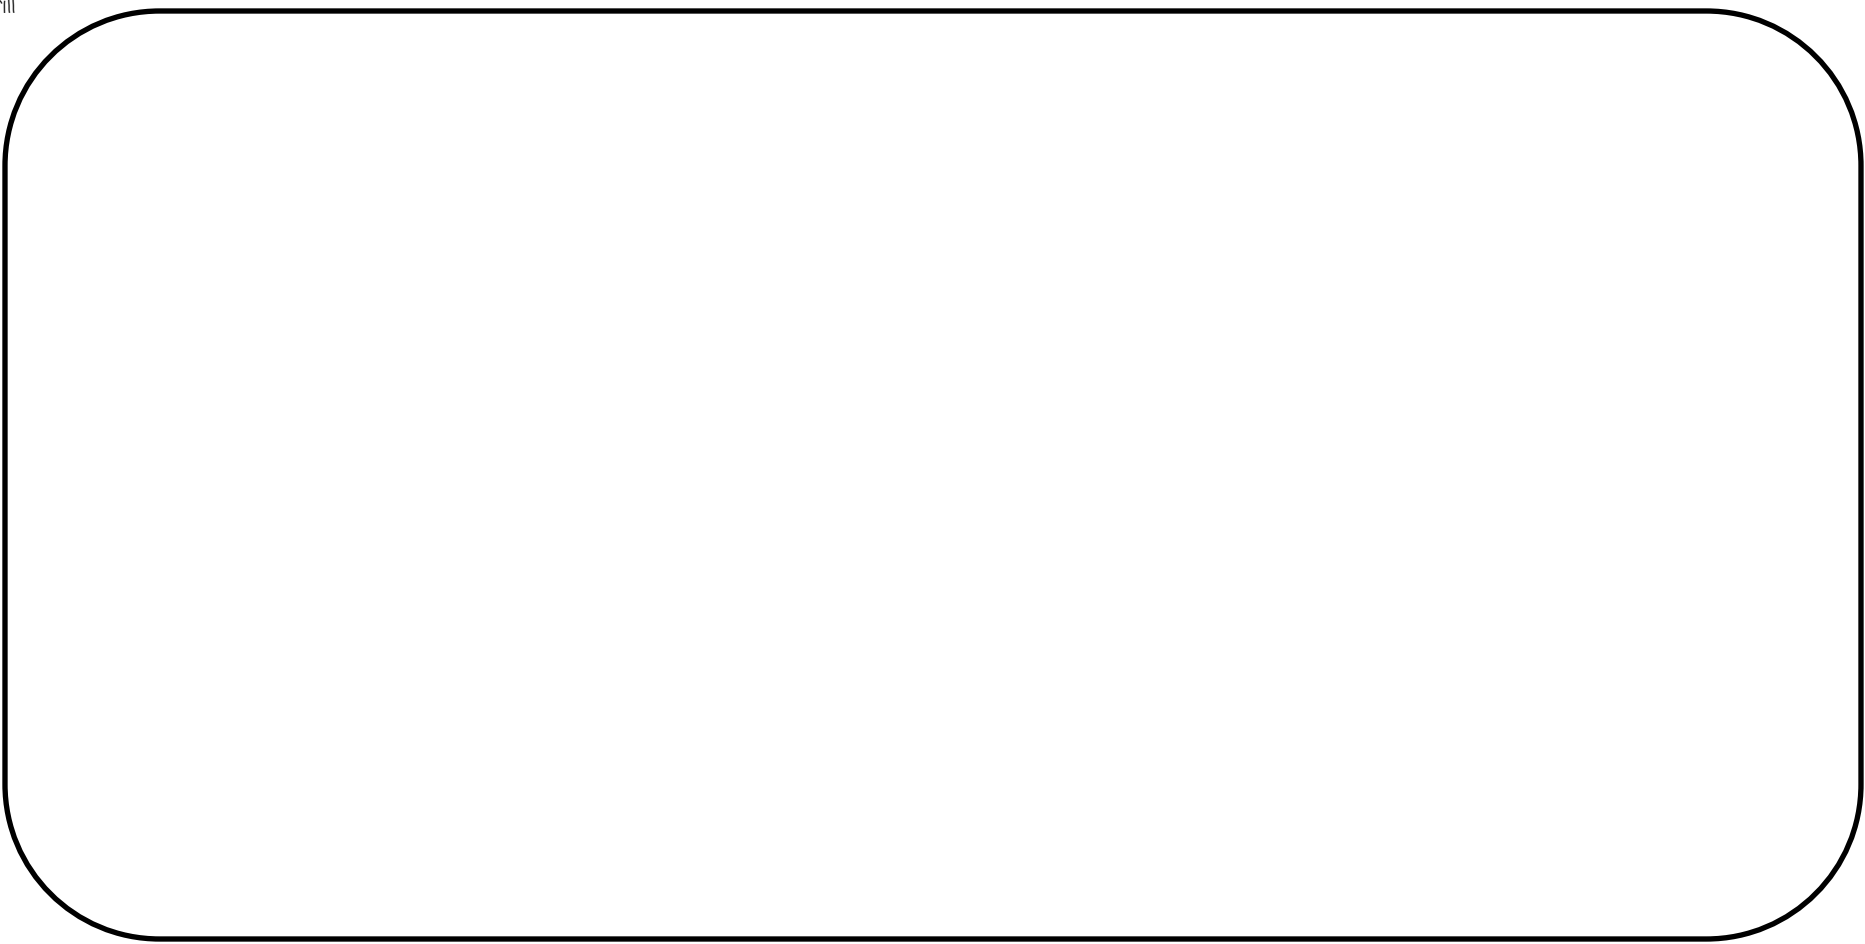

Emperor
Penguin

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed midline. Each row contains a small black dot for starting a letter.

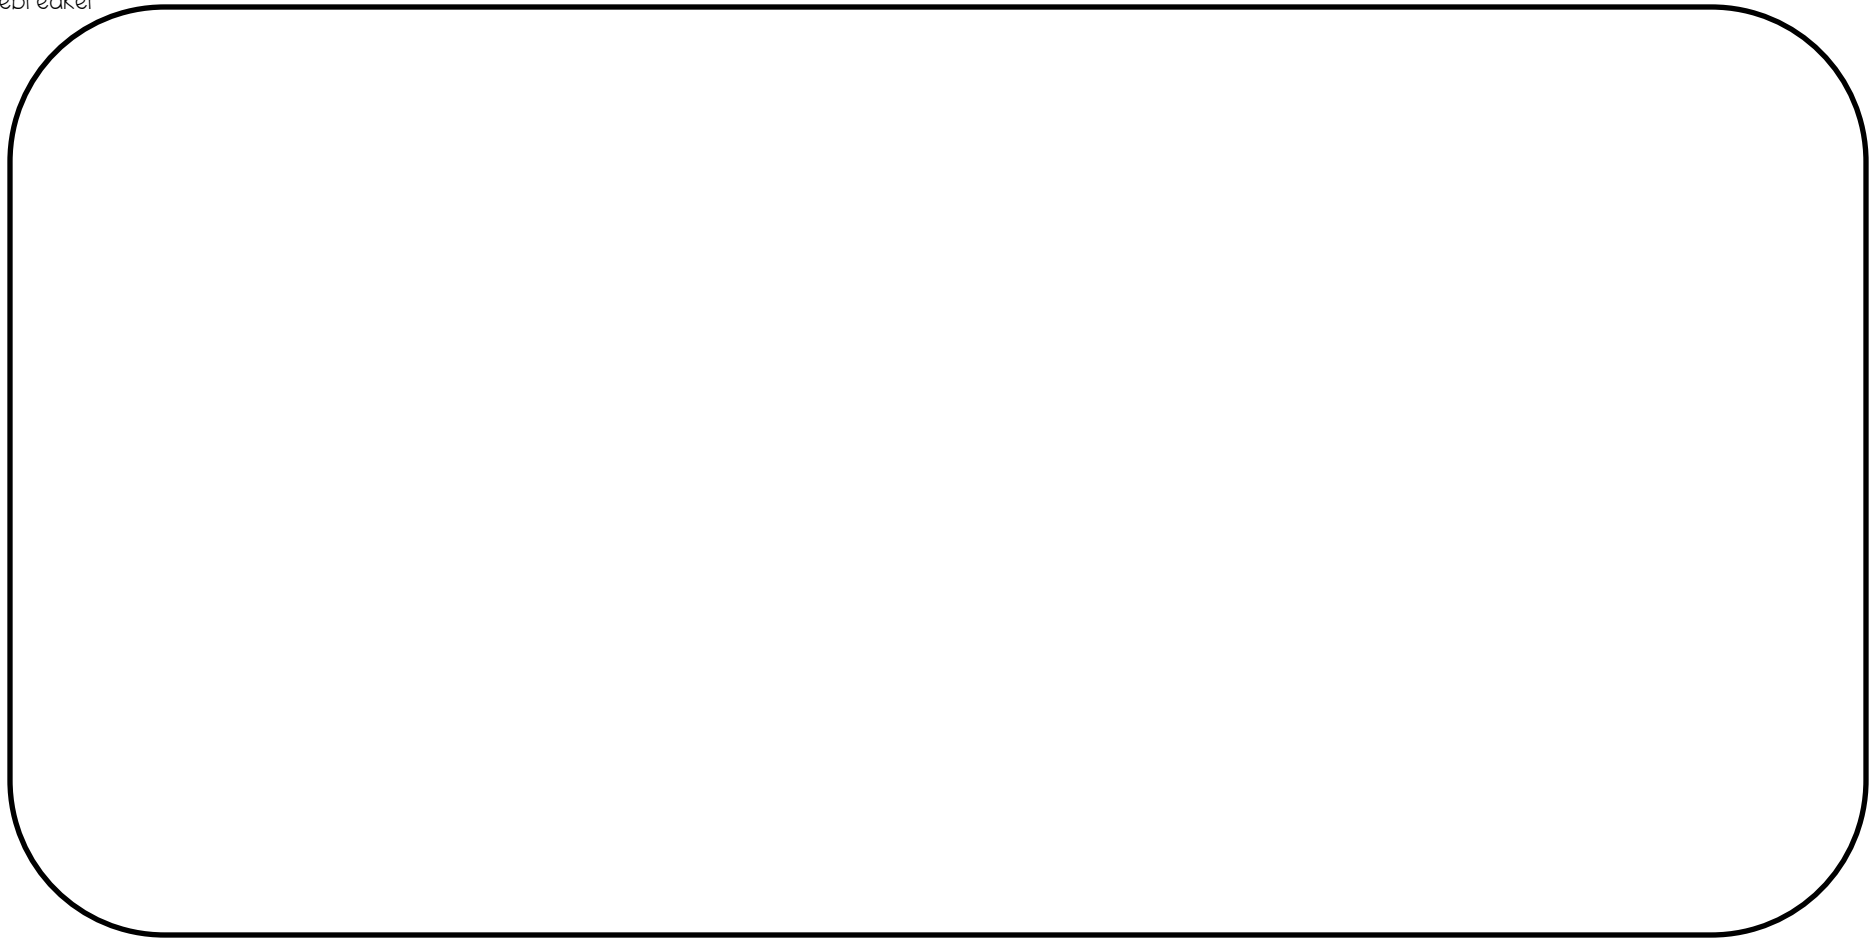

Krill are small shellfish. Many live
in the Southern Ocean. Billions
hatch each summer. Whales and
seals eat them.

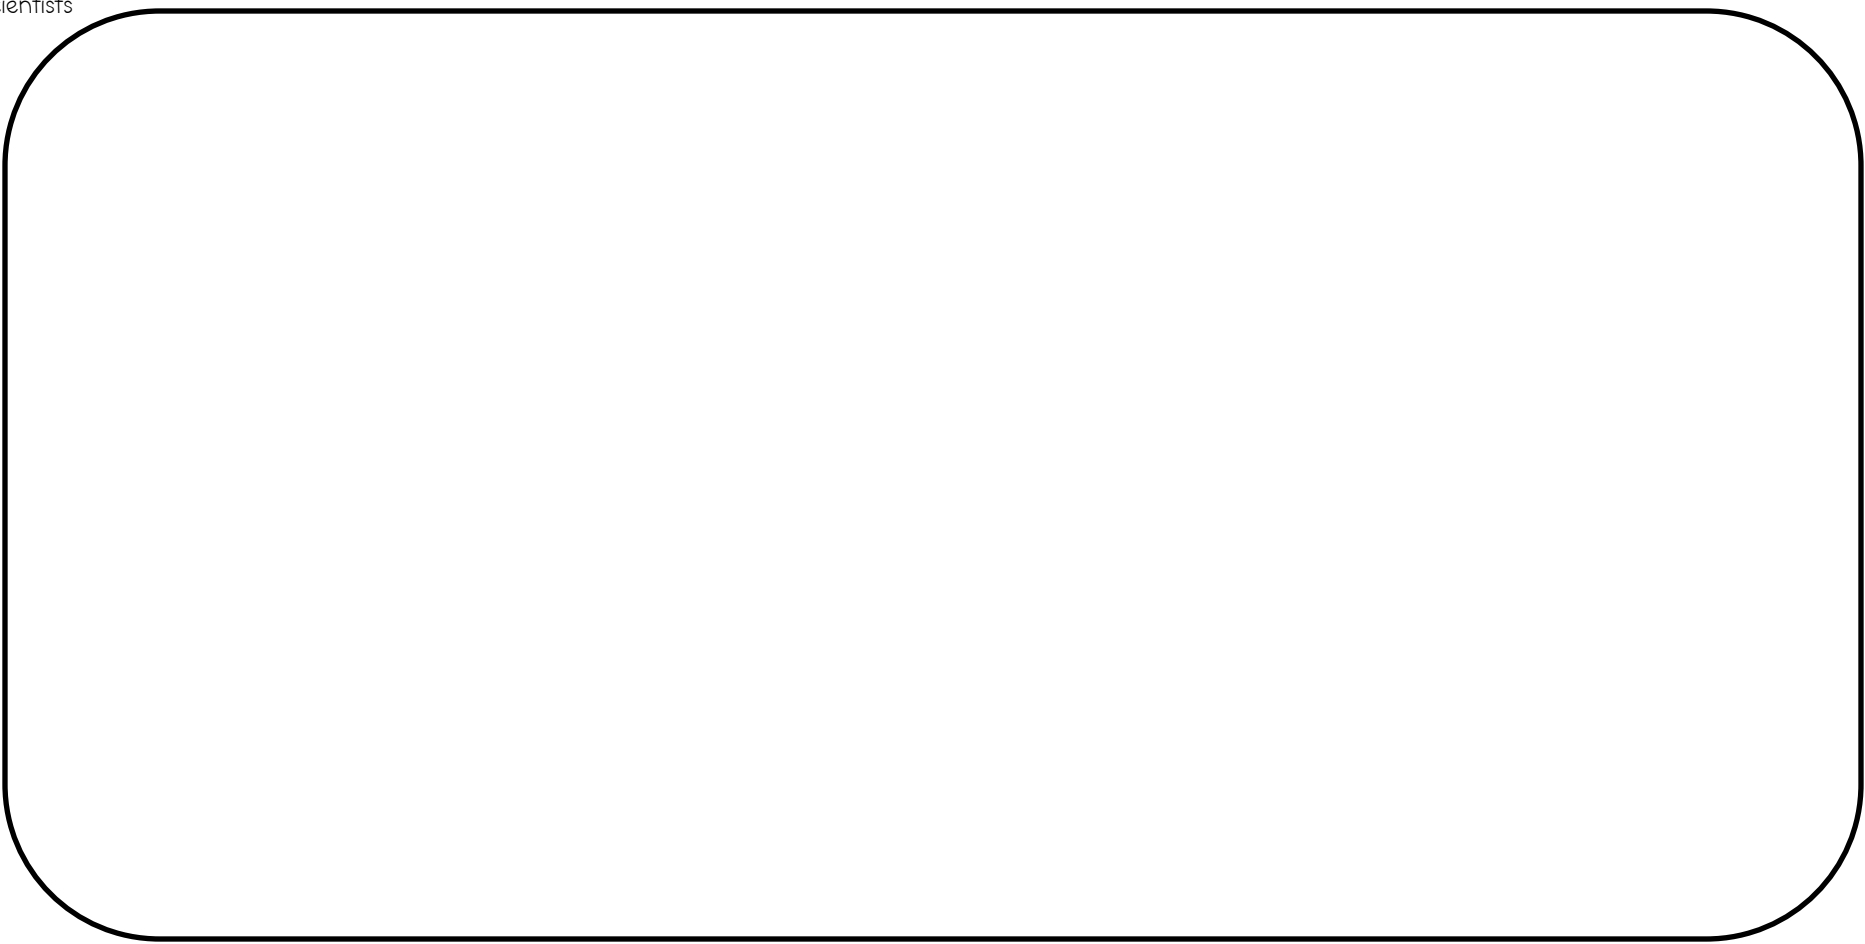

Handwriting practice lines consisting of eight rows. Each row has a solid top line, a dashed middle line, and a solid bottom line. The first row has a dot on the middle line. The second row has a dot on the bottom line. The third row has a dot on the middle line. The fourth row has a dot on the bottom line. The fifth row has a dot on the middle line. The sixth row has a dot on the bottom line. The seventh row has a dot on the middle line. The eighth row has a dot on the bottom line.

Special ships sail to Antarctica.
They are called icebreakers. The
ships push into the ice. They
break the ice into pieces.

Handwriting practice lines consisting of eight sets of horizontal lines. Each set includes a solid top line, a dashed midline, and a solid bottom line. The first four sets have a small black dot on the top line to indicate the starting point for writing. The fifth set has a small black dot on the midline. The sixth set has a small black dot on the bottom line. The seventh set has a small black dot on the top line. The eighth set has a small black dot on the top line.

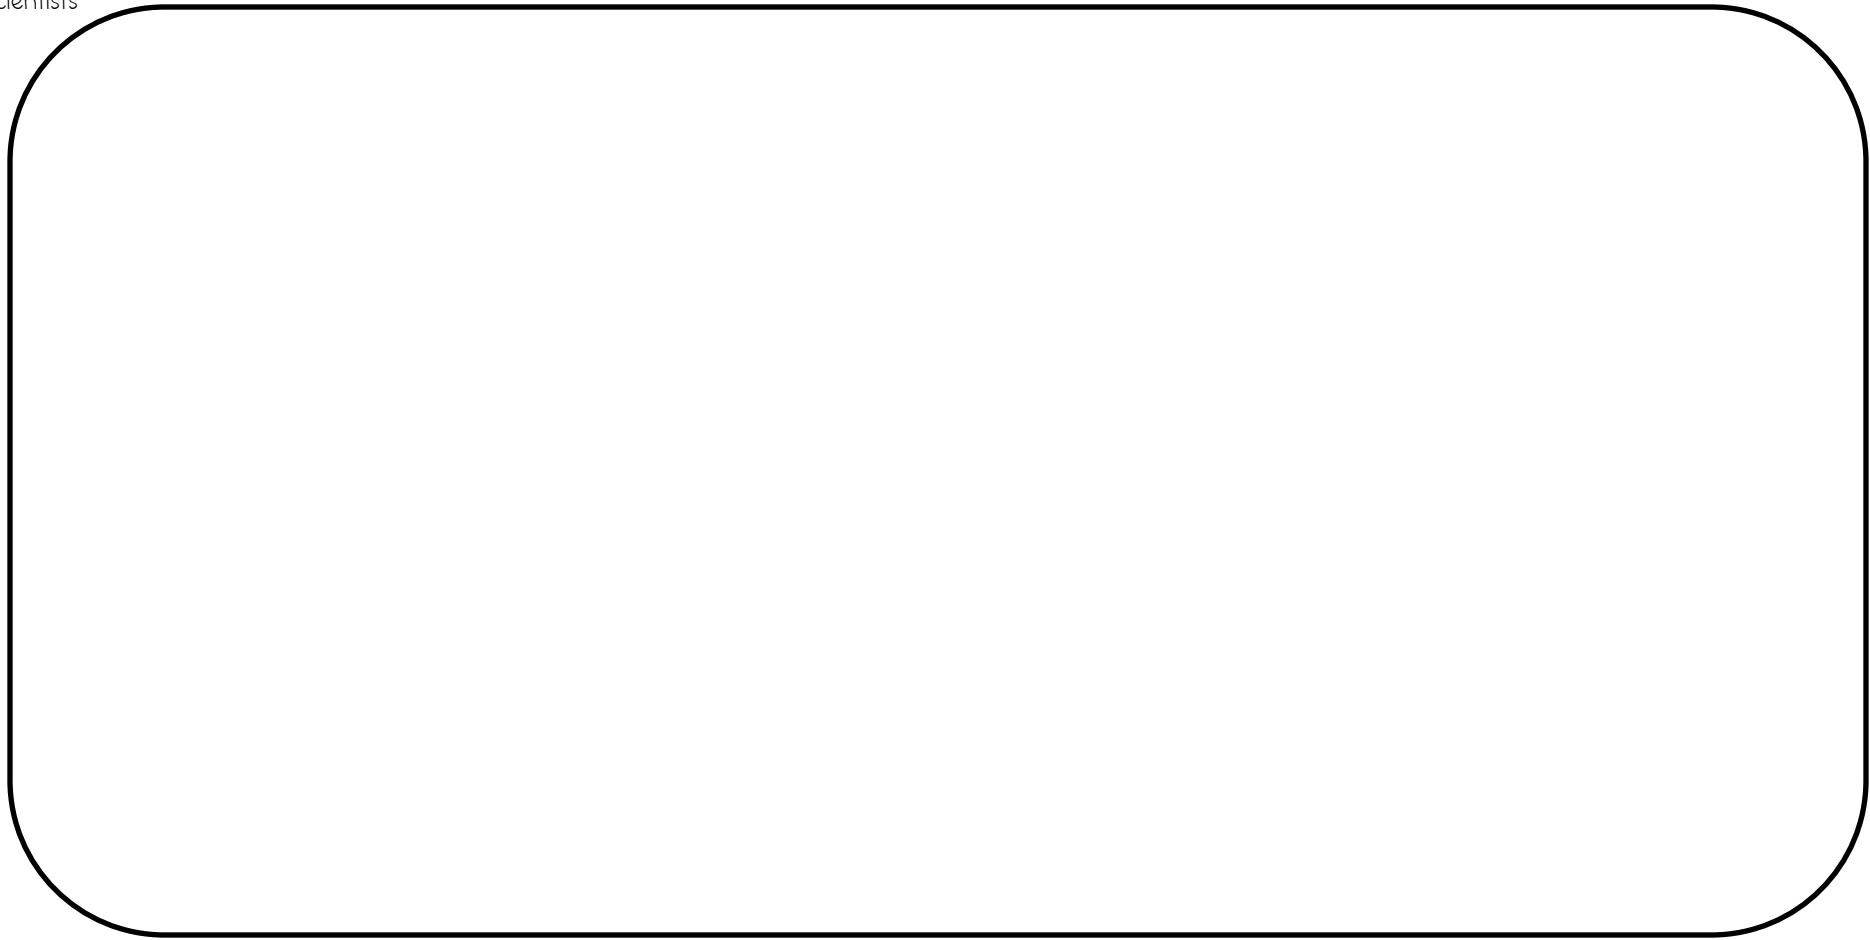

Scientists come to Antarctica.

They study geology and climate.

Some scientists study the ice.

They also study wildlife.

Handwriting practice lines consisting of six sets of three horizontal lines (top, middle dashed, bottom) with a small black dot on the middle dashed line of each set, serving as a starting point for letter formation.
